A. INVESTMENT THEMES

Investment Point 1: Despite the negative impact of Covid – 19, FPT delivered outstanding business results

(i) Growth of the first 8 months slowed down due to corona virus

In 8 months, revenue and profit before tax reached VND 18,321bn (+7.6% YoY) and VND 3,343bn (+11.7%YoY), fulfilling 56.4% and 60.7% of guidance.

Growth of revenue and profit before tax in FY 2020

Source: FPT

Particularly, revenue and pre-tax profit of the first 6 months reached VND 13,610bn (+ 9.0% YoY) and VND 2,427bn (+ 13.5% YoY). Gross profit margin continued to improve to 39.3% from 38.9% in the same period thanks to (i) Cutting expense: marketing expense, traveling expense (due to flight restrictions) and (ii) Increasing revenue contribution of Digital Transformation projects from 8.6% to 13.0 %.

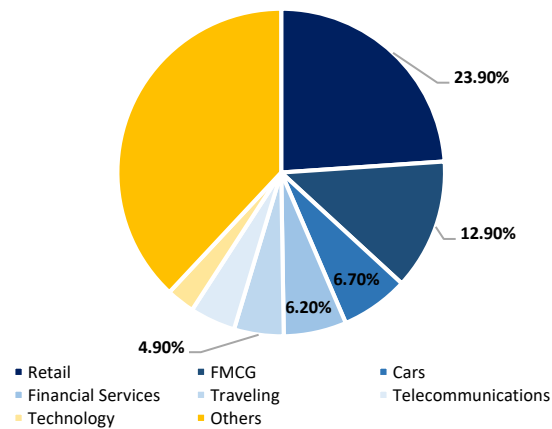

Source: FPT

+ Global Technology segment: Growth rate slowed down in the first 8 months with revenue and profit before tax reaching VND 7,774 bn (+14.4% YoY) and VND 1,239 bn (+ 16.5% YoY). This is due to (i) customers reduce outsourcing demand (especially those in transportation and tourism industries) (ii) it is more difficult to develop new clients and sign contracts due to working remotely instead of meeting face-to-face.

+ Mạng Nội dung số: là mảng sụt giảm mạnh với doanh thu và lợi nhuận trước thuế 7 tháng đạt lần lượt là 262 tỷ (-18.5% YoY) và 120 tỷ (-26.7% YoY). Dịch Covid 19 khiến các doanh nghiệp thu hẹp chi phí hoạt động: trong đó có cắt giảm mạnh chi phí marketing, quảng cáo,...BSC cho rằng mảng Nội dung số khó có thể ghi nhận mức hồi phục trong 6 tháng cuối năm khi tình hình dịch bệnh và kinh tế còn diễn biến phức tạp khiến khách hàng thu hẹp ngân sách hoạt động trong kho các trang báo điện tử vẫn chịu cạnh tranh gay gắt từ các nền tảng mạng xã hội, sàn thương mại.

+ Advertisement segment: this segment recorded a significant drop in growth rate with revenue and profit before tax posting respectively VND 262bn (-18.5% YoY) and VND 120bn (-26.7% YoY). Corona virus makes businesses to cut their marketing and advertising budget. BSC believes that Advertisement segment is unlikely to record a recovery in the last 6 months as the epidemic left an uncertain situation.

(ii) FPT showed outstanding business results compared to its peers

Although the overall growth rate is negatively affected by Covid, FPT still shows outstanding business results compared to the industry: positive growth rate compared to the sideways / decline of most competitors. Moreover, FPT is better in expanding its customer base than other competitors.

(iii) Managers had quickly actions to implement protection measures through the epidemic

Human resource: On July 26 (when the Government officially announced the infected case in Da Nang), FPT issued Directive No. 11. requesting staff members to work from home. This prompt action helps the company minimize the impact when the second wave of infection in Vietnam began.

Financial resources: In addition to the 20% salary reduction for staff at level 5 and above, FPT actively recovers receivables and reduces unnecessary investments. With healthy finance (large cash, business cash flow enough to cover costs), FPT is in a solid position to overcome this difficult period.

Investment point 2: High growth rate is expected in FY 2021

(i) In FY 2021, BSC expects the growth rate to return (detailed information in Valuation section)

+ Software Outsourcing is back to two digit growth rate after being strongly negatively affected in Q2 due to corona virus, signed orders returned with a growth rate of 16% over the same period. Although the growth rate is lower than the pre-corona (20% - 30%), BSC believes that this is the first optimistic signal that orders is returning.

+ Advertisement segment will bounce back from low level 2020: Although BSC believes that 2021 revenue of digital content will be difficult to recover to pre-translation level, it still grows slightly from low level in 2020 when operating businesses are back to normal.

BSC notes that the unpredictable development of Covid-19 is the main risk affecting our business forecast.

(ii) Key driver continues to come from Digital Transformation projects

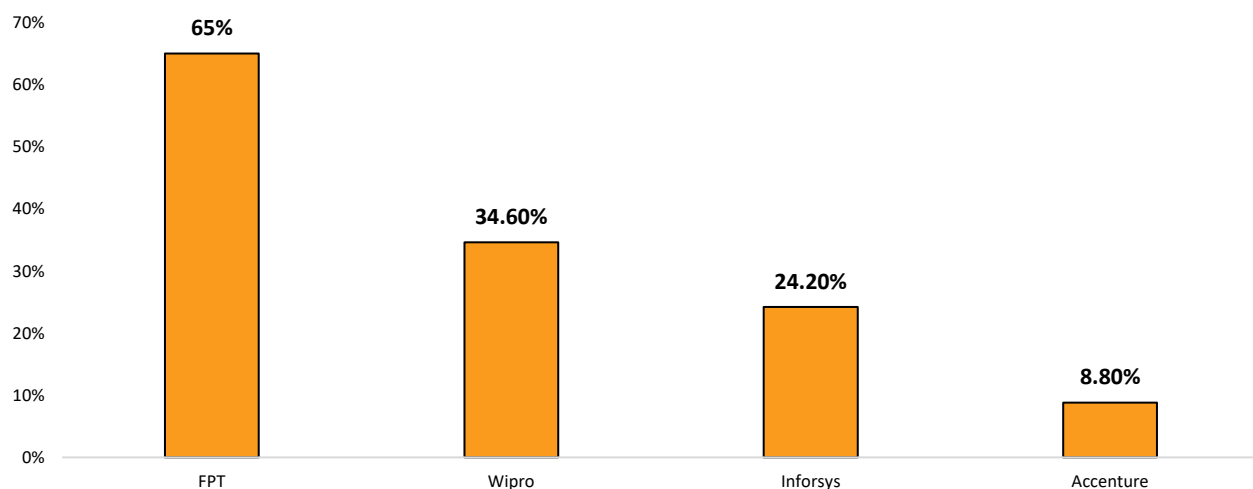

According to ISG research, total global contract value of BPO industry signed in the first 6 months is 13.2 billion USD, down by 5% YoY. In which, traditional contracts recorded the strongest decrease (-16% YoY), contracts related to cloud computing services grew 7% - although this is the lowest growth in 3 recent years. BSC believes

that the digital transformation trend will happen faster thanks to Covid - 19 and will continue to be the main growth driver of FPT in the coming time because of the following reasons:

+ Digital transformation is an inevitable trend coming from the increasing need of businesses wanting to apply digital technology in their business activities. The global Digital Transformation market is expected to grow 16% / year compared with the general 4% / year growth of the IT industry that comes from the main growth of Big Data Analytics, Cloud Computing, Mobile Technology.

+ The Covid epidemic - 19 changes customers' behavior in investing in Technology: increasing demand with cost optimization, optimization of operating systems, .. when business are interrupted in 2020 (working remotely, moving to online platform, ...). These new demands will drive the growth of Digital Transformation projects in the coming time (FPT's revenue from the Transformation project in the first 6 months of the year increase 65% YoY, Infosys's revenue grow 25% YoY).

In order to meet digital transformation demands, FPT has taken quick actions as following:

+ Encouraging Made by FPT products: AkaBot, AkaDoc, Aka Trans, ... BSC believes that the company management is quick to self-develop the products to use. new technology and take advantage of FPT know - how to create products with high added value.

+ Founding FPT Smart Cloud Ltd: focusing on cloud computing service with charter capital of 100 billion VND.

B. FORECAST AND VALUATION

2020 business forecast: BSC expects that growth rate in FY 2020 is hugely impacted by corona virus before returning to the two digit growth rate in FY 2021. Net revenue and NPAT in FY 2020 reach VND 31,840 bn (+14.9% YoY) and VND 4,465bn (+14.% YoY) based on the following assumptions:

- Software outsourcing markets record slowing down growth rate: Revenue of Japan reach VND 6,309bn (+14% YoY), EU market reach VND 1,104 bn (+12% YoY) and USA market reach VND 3,073bn (+15% Yoy).

- Telecom segment post growth in Telecom Services while observing a strong decline in Advertisement segment: Telecom Services revenue reach VND 10,752bn (+9.8% YoY), Advertisement Revenue decline by 12% to VND 524bn

- Gross profit margin post a minor increase to 38.8% from 38.6% in the same period thanks to increasing the contribution of Digital Transformation projects and increasing productivity per employee

- Selling and Administration expense margin reach 23.7% in FY 2020
