## Vietnam Daily Review

### The market fluctuated significantly

BSC's Forecast on the stock market

	Negative	Neutral	Positive
Day 21/1/2021			•
Week 18/1-22/1/2021			•
Month 1/2021		•	

#### Market outlook

**Stock market:** In the morning session, the VNIndex fluctuated significantly, sometimes increased by more than 12 points, sometimes decreased by more than 30 points, but the market gradually stabilized in the afternoon session with a narrower range. Cash flow of investment was positive with 11/19 sectors gaining points. In addition, foreign investors continued to be net buyers on both exchanges, HSX and HNX. However, market breadth was in a negative sideways state with lower liquidity compared to the previous session. According to our assessment, VN-Index may still have strong volatility sessions due to psychological factors and arbitrage transactions in the maturity week of derivative contracts.

**Futures:** All future contracts increased following VN30. Investors might consider buying with target price around 1190 points for long-term contracts.

**Covered Warrant:** In the trading session on January 20, 2021, majority of covered warrants increased following underlying securities. Trading value decreased.
