Market outlook

Stock market: It seems that yesterday's strong gaining session ignited a fire of hope for investors; today's trading volume skyrocketed, showing that the cash flow was rushing back to the market. Although the cash flow supported the VN-Index's gain and the green color covered most industries, the profit-taking pressure prevented the index from rebounding too strongly. At the end of the session, VN-Index returned to close around 1505, a very psychological threshold of the market. Market breadth tilted to the positive side with 15 out of 19 sectors gaining. Regarding the transactions of foreign investors, today they were a net buyer on the HSX and a slight net seller on the HNX. In the coming sessions, the market is likely to continue an old scenario that has been repeated many times, that is, wandering around the threshold of 1505.

Future contracts: Futures contracts all increased according to the movement of the VN30 index. Investors can consider buying short-term contracts.

Covered warrants: In the trading session on March 22, 2022, most of the warrants increased according to the movement of the underlying stock.
