Market outlook

Stock market: The market fluctuated throughout the session today. The VN-Index opened with upward momentum, but when it met psychological zone 1525, selling appeared and pushed the index down to 1505 support zone. Right after that, money flowed to rescue the market, bringing the index back. Despite experiencing a hard session, the market was fortunate to still end the session in the green, increasing by nearly 3 points compared to yesterday. Market breadth tilted to the negative side with 8 out of 19 sectors gaining. Regarding the transactions of foreign investors, today they were a net buyer on the HSX and net a net seller on the HNX. Currently, VN-Index is accumulating around 1505-1525, and in the short term, the index is likely to continue this trend.

Future contracts: Futures contracts all increased according to the movement of the VN30 index. Investors should watch out for short-term futures contracts.

Covered warrants: In the trading session on April 6, 2022, warrants struggled to follow the movement of the underlying stock.

Outlook:

- VN30 increased 17.91 points to 1557.11 points. Stocks such as VPB, FPT, HPG, TCB, MWG have positively impacted VN30's movement. VN30 is retesting the threshold of 1550 points. However, the market's momentum is quite weak and it is likely that it will be difficult to overcome the resistance level.
- Futures contracts all increased in line with the movement of the VN30 index. In terms of trading volume, all contracts increased slightly. In terms of open positions, VN30F2206 dropped sharply, the remaining contract increased insignificantly. The increase in the score and the decrease in open interest indicate a short movement. Investors should watch out for short-term futures contracts.
