VN-Index dropped sharply

BSC's Forecast on the stock market

	Negative	Neutral	Positive
Day 2/2/2023		•	
Week 30/1-3/2/2023		•	
Month 02/2023		•	

Market outlook

Stock market: VN-Index fluctuated around 1,100 during the whole morning session. In the afternoon session, suddenly, selling force appeared and pushed the index down to close at 1,075.97 points, down more than 3% compared to yesterday. Market breadth tilted to the negative side with 17 out of 19 sectors ending in the red, in which Financial Services led the decline. Regarding the transactions of foreign investors, today they were net buyers on both HSX and HNX. A strong decline session with significant liquidity like today's hints that the market may continue to lose momentum in the short term. BSC expects the market to bounce back when it hits the support area around 1,050 points.

Future contracts: Futures contracts decreased according to the movement of VN30. It is recommended that investors trade cautiously in the coming sessions.

Covered warrants: In the trading session on February 1, 2023, covered warrants fluctuated along with the downtrend of the underlying stocks.
