**II. ACCOUNTING PERIOD AND ACCOUNTING MONETARY UNIT**

**1. Accounting period**

Annual accounting period commences from 1st January and ends on 31st December. For this accounting period, the Company prepares the Interim Financial Statements for period from 01/01/2025 to 31/12/2025

**2. Accounting monetary unit**

Monetary unit used in accounting is Viet Nam Dong (National symbol is “đ”; International symbol is “VND”).

**III. ACCOUNTING STANDARDS AND ACCOUNTING SYSTEM**

**1. Accounting System**

The company applies Enterprise Accounting System issued under Circular No. 200/2014/TT-BTC dated 22 December, 2014 by Minister of Finance on guideline enterprise accounting and Circular No. 53/2016/TT-BTC dated 21 March, 2016 by Ministry of Finance amending and supplementing some articles of Circular No. 200/2014/TT-BTC.

**2. Announcement on compliance with Vietnamese standards and accounting system**

The company applies Vietnamese Accounting Standards and supplement documents issued by the State. Financial statements are prepared in accordance with regulations of each standard and supplement documents as well as with current accounting system.

**IV. ACCOUNTING POLICIES**

**1. Exchange rates applied in accounting system**

The Company which has transactions in foreign currencies performs accounting records and prepares financial statements in one consistent currency - VND. The conversion of foreign currencies into VND is based on:

- Actual transacted exchange rate;
- Accounting recorded exchange rate.

## **2. Principles for determining the effective interest rate (actual interest rate) used to discount cash flows**

The effective interest rate (actual interest rate) is determined as follows:

- It is the lending interest rate of commercial banks that is commonly applied in the market at the time of the transaction;
- If the aforementioned lending interest rate of commercial banks cannot be determined, the effective interest rate is the rate at which the Company can borrow through the issuance of debt instruments that do not have the right to convert into shares (such as issuing non-convertible bonds or borrowing through ordinary promissory notes) under normal production and business conditions

## **3. Recognition of cash and cash equivalents**

Cash and cash equivalents comprise cash on hand, cash in banks and short-term, highly liquid investments with an original maturity of less than three months that are readily convertible into known amounts of cash and that are subject to an insignificant risk of change in value.

The funds deposited by other enterprises and individuals as collateral or margin at the Company are managed and recorded as the Company's funds.

When arising transactions in foreign currencies, foreign currencies shall be converted into Vietnam dong under the principle: Debit transactions are applied with actual exchange rates; Credit transactions are applied with weighted average exchange rates in book.

At the time of preparing the financial statements in accordance with legal regulations, foreign currency balances are revalued based on the actual transaction exchange rate, which is the foreign currency buying rate of the commercial bank where the company regularly conducts transactions at the time of preparing the financial statements

## **4. Financial investment**

### ***a. Held-to-maturity investments***

Includes term deposits in banks and loans held until maturity for the purpose of earning periodic interest

For investments held to maturity, if not already provision for bad debts in accordance with law and accounting assessing recoverability, accountants conduct reviews of the ability to recall. Where there is strong evidence suggesting that part or all of the investment may not be recoverable, the accountants shall record the periodical losses in financial expenses. In case of loss cannot be reliably determined, accountants conduct the accounting disclosures in financial statements about the recoverability of investments.

### ***b. Loans receivables***

Loans based on agreements between parties that are not traded in the market like securities. Depending on the contract, these loans may be repaid in a lump sum at maturity or gradually repaid in installments.

For loans, if a provision for doubtful debts has not been established according to legal regulations, the accountant assesses the recoverability. If there is clear evidence that part or all of the loan may not be recoverable, the accountant recognizes the losses as financial expenses for the period. If the amount of loss cannot be reliably determined, the accountant discloses the recoverability of the loan in the financial statements.

## **5. Receivables**

The classification of receivables is done into customer receivables and other receivables based on the principle:

a. Receivables from customers include receivables of a commercial nature arising from buy-sell transactions, such as: receivables from sales of goods, provision of services, liquidation, and disposal of assets (fixed assets, financial investments) between the company and the buyer (an independent entity from the seller, including receivables between the parent company and subsidiaries, joint ventures, and associates). This receivable also includes amounts receivable from the sale of exported goods by the consignor through the consignee.

b. Other receivables include receivables that are non-commercial in nature and not related to buy-sell transactions, such as:

- Receivables that generate financial income, such as receivables for interest on loans, deposits, dividends, and profits distributed;
- Amounts paid on behalf of third parties that are entitled to reimbursement; receivables for export transactions collected on behalf of the consignor;
- Non-commercial receivables such as loans of assets, receivables for penalties, compensation, and missing assets pending resolution...

When preparing the financial statements, accountants classify receivables as long-term or short-term based on their remaining terms. The receivable items in the balance sheet may include amounts reflected in accounts other than receivables, such as: loans reflected in account 1283; deposits or guarantees reflected in account 244; and advances reflected in account 141...

Receivables in foreign currencies need to be re-evaluated at the end of the year when preparing financial statements. Actual transacted exchange rate when re-evaluating receivables in foreign currencies at the time of preparing financial statements is the published exchange rate of the commercial bank with which the Company often have transactions (selected by the Company when transacts with receivable subject).

Provision for doubtful receivables is established for each receivable deemed difficult to collect, based on regulations regarding the aging of overdue debts and the estimated level of potential losses.

The identification of necessary provision for doubtful debts is based on the items that are classified as short-term, long-term receivables on Balance Sheet. Provision for doubtful debts is made for each one based on the age of overdue debts or the estimated losses that may occur.

## **6. Inventory**

### ***a. Principles of recognizing inventories***

Inventories of the company are assets purchased for production or for sale during the normal production and business cycle. For work-in-progress, if the production and turnover time exceeds a normal business cycle, it should not be presented as inventory on the balance sheet but classified as a long-term asset.

Types of products, goods, materials, assets held in custody, consigned goods, entrusted import-export, and processing items that are not owned or controlled by the company should not be recognized as inventory.

Inventories are stated at original cost. Where the net realizable value is lower than cost, inventories should be measured at the net realizable value. The costs of inventories comprise the purchase price, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

### ***b. Method of calculating inventories***

The method for determining the value of work-in-progress: the costs of unfinished production are accumulated based on the actual expenses incurred for each stage of production.

### ***c. Method of accounting inventories***

Inventory is recorded by perpetual.

### ***d. Method of setting up provision for devaluation of inventories***

Provisions for devaluation of inventories made at the end of the year are the excess of original cost of inventory over their net realizable value.

## **7. Fixed assets and depreciation of fixed assets**

Fixed assets (tangible and intangible) are stated at the historical cost. During the using time, fixed assets (tangible and intangible) are recorded at cost, accumulated depreciation and net book value.

Finance lease assets are recorded at their original cost based on fair value or the present value of minimum lease payments (excluding VAT) and any directly attributable initial costs related to the finance lease asset. During use, finance lease assets are recorded at original cost, accumulated depreciation, and remaining value.

Depreciation is calculated using the straight-line method. The estimated depreciation periods are as follows:

- Buildings	08 - 20 years
- Machine, equipment	05 - 08 years
- Transportation equipment	05 - 08 years
- Office equipment and furniture	03 -05 years

## **8. Prepaid expenses**

Prepaid expenses related to the production and business costs of a financial year or a business cycle are recorded as short-term prepaid expenses and are charged to production and business costs within that financial year. Expenses incurred in the financial year but related to the operational results of multiple accounting periods are recorded as long-term prepaid expenses to be gradually allocated to business results in subsequent accounting periods.

The calculation and allocation of long-term prepaid expenses to profit and loss account in the period should be based on nature of those expenses to select a reasonable method and allocated factors. Prepaid expenses are allocated partly into operating expenses on a straight-line basis.

## **9. Payables**

The classification of payables is done according to the following principles:

- a. Trade payables include amounts owed to sellers arising from transactions for the purchase of goods, services, or assets, and the seller (who is independent of the buyer, including amounts owed between parent and subsidiary companies, joint ventures, and affiliates). This payable also includes amounts due upon import through a trustee (in consignment import transactions).
- b. Other payables include non-commercial payables not related to the purchase, sale, or provision of goods and services:
  - Payables related to financial costs, such as interest payable, dividends and profits payable, and investment operation costs payable;
  - Payables due to third-party payments; amounts received by trustees from related parties for payment as directed in import-export consignment transactions;
  - Non-commercial payables such as those arising from borrowed assets, penalties, compensation, unprocessed surplus assets, and social insurance, health insurance, unemployment insurance, and trade union fees payable...

When preparing financial statements, accountants classify payables as long-term or short-term based on the remaining term. When there is evidence indicating that a loss is likely to occur, accountants immediately recognize a payable based on the principle of prudence.

Payables in foreign currencies need to be re-evaluated at the year end when preparing financial statements. Actual transacted exchange rate when re-evaluating payables in foreign currencies at the time of preparing financial statements is the published exchange rate of the commercial bank with which the Company often have transactions (selected by the Company when transacting with payable subjects).

## **10. Recognition of borrowings**

Borrowings whose maturity time is over 12 months from the date of financial statements are presented as long-term borrowings and financial lease liabilities. Borrowings whose maturity time is within 12 months from the date of financial statements are presented as short-term borrowings and financial lease liabilities to prepare settlement plan.

Borrowing costs directly related to the loan (beyond interest payable), such as evaluation, audit, and loan documentation costs, are recorded as financial expenses. If these costs arise from loans specifically for investment, construction, or the production of work-in-progress, they can be capitalized.

When preparing financial statements, the balances of foreign currency loans are re-evaluated based on the actual exchange rates at the time of preparing the financial statements. Any exchange rate differences arising from payments and end-of-period re-evaluations of foreign currency loans are recorded as revenue or financial operating expenses.

## **11. Recognition and capitalization of borrowing costs**

Borrowing costs are recognized into operating costs during the period, except for which directly attributable to the acquisition, construction or production of a qualifying asset included (capitalized) in the cost of that asset, when gather sufficient conditions as regulated in SAV No. 16 "Borrowing costs".

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset that takes more than 12 months to put into use under certified purposes or for sale should be included (capitalized) in the cost of that asset, including interest on borrowings, amortization of discounts or premiums relating to issuing bonds and ancillary costs incurred in connection with the arrangement of borrowings.

For loans specifically for the construction of fixed assets or investment properties, interest costs can be capitalized even when the construction period is less than 12 months.

**12. Accrued expenses**

Payables for goods and services that are already received from suppliers or already supplied to buyers in the reported period but not actually paid due to shortage of bills or accounting files and documents are recognized as operating expenses of the reported period.

Recognizing accrued expenses into operating expenses in the period needs to be performed according to the matching principle between revenues and expenses incurred in the period.

Accrued expenses shall be balanced with actual incurred expenses. The difference between accrued and actual expenses shall be reversed.

**13. Owner's equity*****a. Principles of recognizing owner's equity***

Owner's equity is stated at actually contributed capital of owners.

***b. Recognition Undistributed profit***

Profit after tax retained is the profit of business operations after deduction (-) regulated items due to applying a change in accounting retrospectively or to make a retrospective restatement to correct materiality in previous years. The profit is available for appropriation to investors after approval by Board of Management and after making appropriation to reserve funds in accordance with the Company's Charter and Vietnamese regulatory requirements.

**14. Revenue*****a. Sale of goods***

Revenue from sale of goods should be recognized when all the following conditions have been satisfied:

- The entity has transferred to the buyer the significant risks and rewards of ownership of the goods;
- The entity retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- The amount of revenue can be measured reliably;
- It is probable that The economic benefits associated with the transaction will flow to the entity;
- The cost incurred or to be incurred in respect of the transaction can be measured reliable.

***b. Rendering of services***

When the outcome of a transaction involving the rendering of services can be estimated reliable, revenue associate with the transaction shall be recognised by reference to the stage of completion of the transaction at the end of reporting period. The outcome of a transaction can be estimated reliable when all the following conditions are satisfied:

- The amount of the revenue can be measured reliably;
- It is probable that the economic benefits associated with the transaction will flow to the entity;
- The stage of the completion of the transaction at the end of the reporting period can be measured reliably;
- The costs incurred for the transaction and the costs to complete the transaction can be measured reliable.

The stage of the completion of the transaction may be determined by surveys of work completed methods.

***c. Financial income***

Revenue arising from the used by the others of entity assets yielding interest, royalties and dividends shall be recognised when:

- It is probable that the economic benefits associated with the transaction will flow to the entity;
- The amount of the revenue can be measured reliably.

Dividends shall be recognised when the shareholder's right to receive payment is established.

***d. Other revenues***

Recognition of other revenues beside the entity's business activities includes:

- Revenue from liquidation of fixed assets;
- Income from the sale and leaseback of assets;
- Taxes payable upon the sale of goods and provision of services that are later reduced or refunded (such as refundable export taxes, reduced VAT, special consumption tax, and environmental protection tax)
- Revenue from the third party's compensation for a loss of property (e.g. insurance compensation, compensation for relocating business office and other similar revenues);

- Revenue from fines paid by customers for breaching contracts;
- Other revenues than those listed above.

**15. Deductibles from revenue**

Deductibles adjusted to revenues from sale of goods and rendering of services arising in the period include: Sale discounts, sale rebates and sale returns.

In case that products, goods and services have already been consumed since the previous period, but until the subsequent period, sale discounts, sale rebates or sale returns incur, then the Company recognizes deductibles from revenue according to the following requirements:

- If products, goods and services have already been consumed since the previous period and need to be discounted, rebated, returned in the subsequent period but before the time of issuing financial statements, accountants recognize it as an event that needs to be adjusted arising after the date of Balance Sheet and deduct revenues of the period's financial statements (the previous period).
- In case that products, goods and services need to be discounted, rebated, returned after the time of issuing financial statements, the entity needs to deduct revenues of the arising period (the subsequent period).

**16. Cost of goods sold**

Reflecting the cost value of products, goods and services sold in the period.

The provision for devaluation of inventories is included in the cost of goods sold on the basis of the number of inventories and the difference between the net realizable value is less than the cost of inventories.

As for the value of inventory shrinkage and loss, accountants immediately count towards cost of goods sold (after deducting the compensation, if any).

As for the cost of direct materials consumed in excess of normal level, labour cost, fixed general operation unallocated to the value of products stocked, accountants immediately count them towards in cost of goods sold (after deducting the compensation, if any) even if the products and goods have not been determined to be consumed.

Import duties, special consumption taxes and environmental protection taxes have been included in the value of purchased goods, and when the goods are sold, those taxes are refunded, the decrease of the cost of goods sold is recorded.

As for costs of goods sold unrecognized as corporate income taxable expenses under the regulations of Tax law but with full of invoices and documents and accounted reasonably under Accounting system, the Company does not reduce accounting expenses but adjusts in the corporate income tax settlement to increase corporate income tax payable.

**17. Financial expenses**

Reflecting financial expenses including expenses or losses related to financial investment activities, expenses of lending and borrowing equity, expenses of contributing in joint ventures, associates, losses of transferring short-term securities, expenses of selling securities transactions; Provision for devaluation of trading securities, provision for loss of investments in other entities, losses of selling foreign currencies, losses of exchange rate...

As for financial expenses unrecognized as corporate income taxable expenses under the regulations of Tax law but with full of invoices and documents and accounted reasonably under Accounting system, the Company does not reduce accounting expenses but adjusts in the corporate income tax settlement to increase corporate income tax payable.

**18. Selling expenses and administrative expenses**

Expenses recognized as selling expenses include: Expenses actually arising in process of selling products, goods and rendering services including expenses for offering, introducing, advertising products, sale commissions, expenses for products' warranty, storage, packing, transporting, ...

Expenses recognized as administrative expenses include: Expenses for administrative labour (salaries, wages, allowances,...); social insurance, health insurance, union fund, unemployment insurance of administrative staffs; expenses of office commodities, working tools, depreciation of fixed assets used for administration; land rent, excise; provision for doubtful receivables; outside purchasing costs (electricity, water, telephone, fax, asset insurance, fire insurance...); other costs in cash (guest receptions, customer conferences...).

As for selling expenses and administrative expenses unrecognized as corporate income taxable expenses under the regulations of Tax law but with full of invoices and documents and accounted reasonably under Accounting system, the Company does not reduce accounting expenses but adjusts in the corporate income tax settlement to increase corporate income tax payable.

**19. Principles and methods of recognizing current corporate income tax**

Current corporate income tax expense is the amount of corporate income tax payable counted on taxable income in the period and prevailing tax rate. Currently, the company is applying a corporate income tax rate of 20%.

The Company's tax settlements are subject to examination by the tax authorities. Because the application of tax laws and regulations on many types of transactions is susceptible to varying interpretations, amounts reported in the financial statements could be changed at a later date upon final determination by the tax authorities.

**20. Principles and methods of recognizing current corporate income tax**

Consolidated financial statements are prepared based upon consolidating separate financial statements of the Company and its subsidiaries under its control as at 31 December annually. Control rights is in practice when the company has power to govern the financial and operating policies of invested companies to obtain benefits from their activities.

Financial statements of subsidiaries are prepared for the same fiscal as the company, using consistent accounting policies. If necessary, financial statements of subsidiaries may be adjusted to ensure the consistence between accounting policies applied at the company and its subsidiaries.

Operation results of subsidiaries which were purchased or liquidated in the period are presented on consolidated financial statements since the purchasing or liquidated dates.

Balance, main income and expense, including unrealized profits from intra-group transactions are eliminated in full from consolidated financial statements.

Non-controlling interest reflecting profits or losses and net assets which are not held by shareholders of the company will be presented in a separate item on consolidated statement of financial position and consolidated statement of comprehensive income.

**21. Other accounting principles and methods**

**Related parties**

Enterprises and individuals that directly or indirectly through one or more intermediaries, have control on or are under control of the Company, or are under common control with the Company, including parent companies, subsidiaries and associates are related parties. Associates and individuals that directly or indirectly hold voting right of the Company and have a significant impact on the Company, key management personnel including Board of Directors and employees of the Company, closed family members of these individuals or these associates or companies associated with these individuals are also considered as related parties.

In considering each relationship of related parties, it is necessary to pay attention to the nature of the relationship, not only its legal form.
