The reason for the decrease in production and business efficiency in the first 6 months of this year compared to the same period in 2025 is due to:

- + Fixed costs increased compared to the same period in 2025;
- + The conflict in the Middle East has driven oil prices higher, directly impacting the domestic fishing industry and the market for fishing nets;
- + Input prices of plastic resin have continuously increased in line with rising oil prices;
- + The continued strength of the USD exchange rate has led to higher input material costs.

Yours Sincerely.
