Market outlook

Stock market: With the news that the US stock market recovered positively, Vietnam's stock market opened with an excited trading status. But the gaining momentum quickly weakened and turned to decline in the middle of the afternoon session. Market liquidity is at moderate level along with negative market breadth, showing that selling pressure is spreading across the market. All 19/19 industry sector corrected today with the Chemical group dropping the most. Foreign investors continued their net selling trend on both exchanges. In general, VN-Index is still in the bottom-finding phase with a stronger support at 1,100 points. BSC maintains a cautious view and waiting approach until the news of interest rate hikes weakens in the market.

Future contracts: All contracts decreased according to VN30. Investors should trade cautiously in the next session.

Covered warrants: In the trading session on September 29, 2022, covered warrants decreased along with the downtrend of the underlying stocks.
