BSC's Forecast on the stock market

	Negative	Neutral	Positive
Day 10/4/2023		•	
Week 10/4-14/4/2023		•	
Month 04/2023		•	

'Market outlook:

Stock market: There was a narrow trading range with a downward trend in the market today. The market breadth tilted towards the negative side with more decliners than advancers. Of the 19 sectors in the market, 13 sectors gained, with the financial services sector being the main support. Regarding foreign trading, foreign investors were net sellers on both the HSX and HNX exchanges today. The movement signals of the VN-Index are still unclear as testing sessions at the 1060 threshold are expected to occur next week. The ongoing earnings season is causing differentiation in money flow into fundamentally strong stocks with positive business prospects. Investors are advised to wait and consider opening positions in good fundamental stocks when the market's bottoming signals become clear.

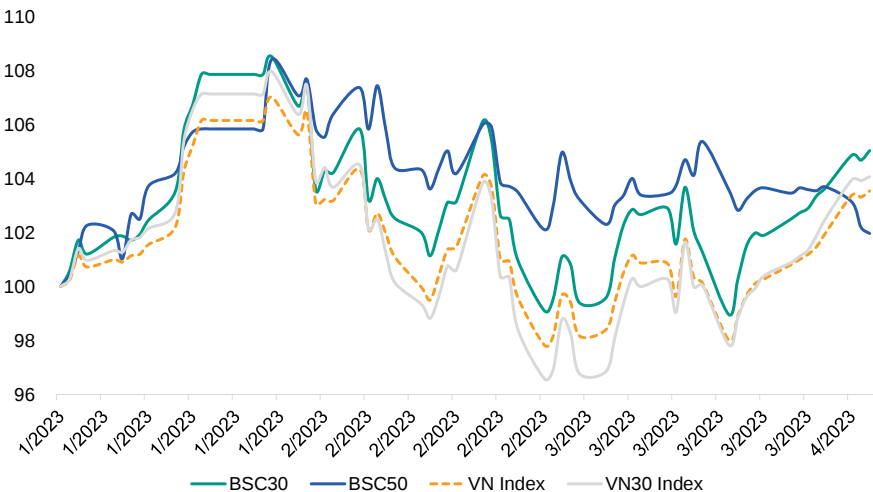

Future contracts: Futures contracts increased according to the movement of VN30, especially VN30F2306 fluctuated in the opposite direction. It is recommended that investors trade cautiously in the coming sessions.

Covered warrants: In the trading session on April 7, 2023, covered warrants fluctuated along with the struggling movement of the underlying stocks.
