## Trade war 2.0

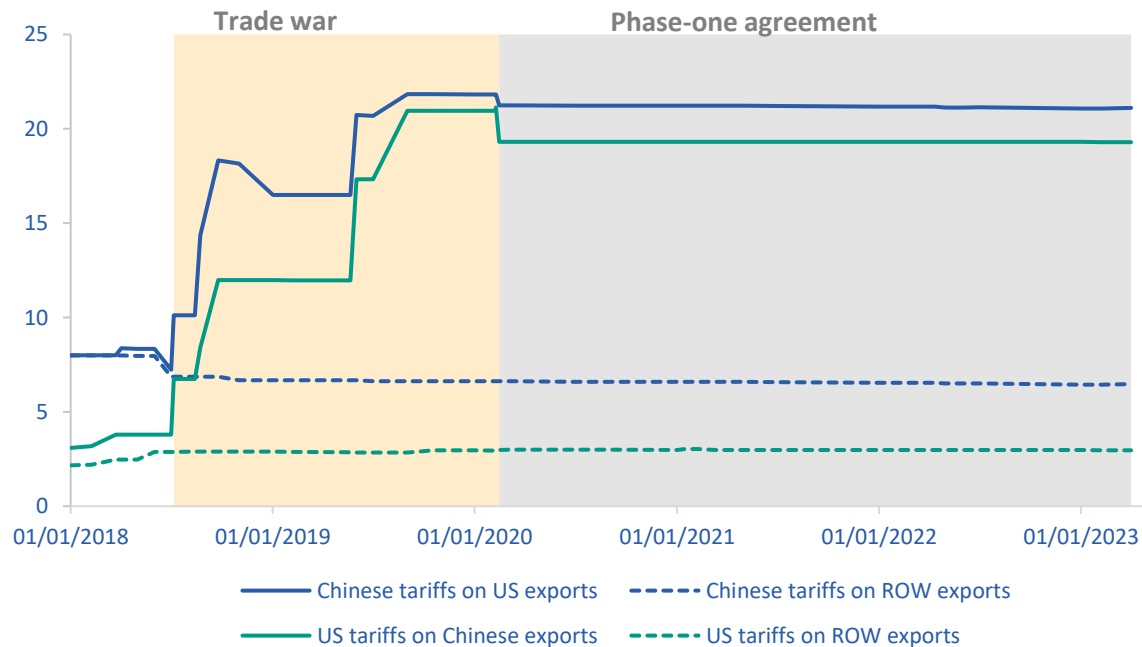

## Taxation Objectives

- Targeting countries with trade surpluses and unfair practices against the U.S., including China, Canada, Mexico, the EU, Japan, Brazil, and Vietnam...
- The ultimate goal is to secure the highest benefits for the United States and its citizens.

## Taxation Area

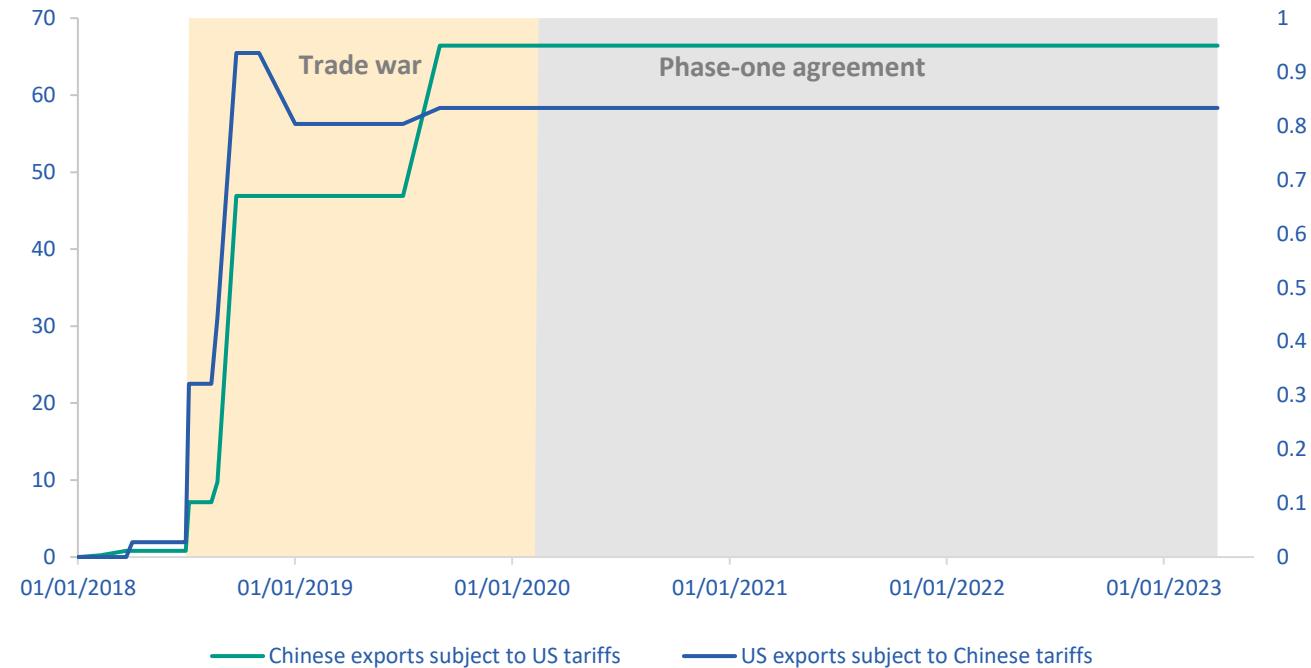

- According to the Peterson Institute for International Economics (PIIE), Donald Trump imposed tariffs on six main fronts: (1) Solar panels and washing machines; (2) Steel and aluminum; (3) Technology and intellectual property; (4) Automobiles; (5) Immigration from Mexico; and (6) Semiconductors.

US-China tariff rates toward each other and rest of world (percent)

ROW = Rest of the world

Percent of US-China trade subject to tariffs

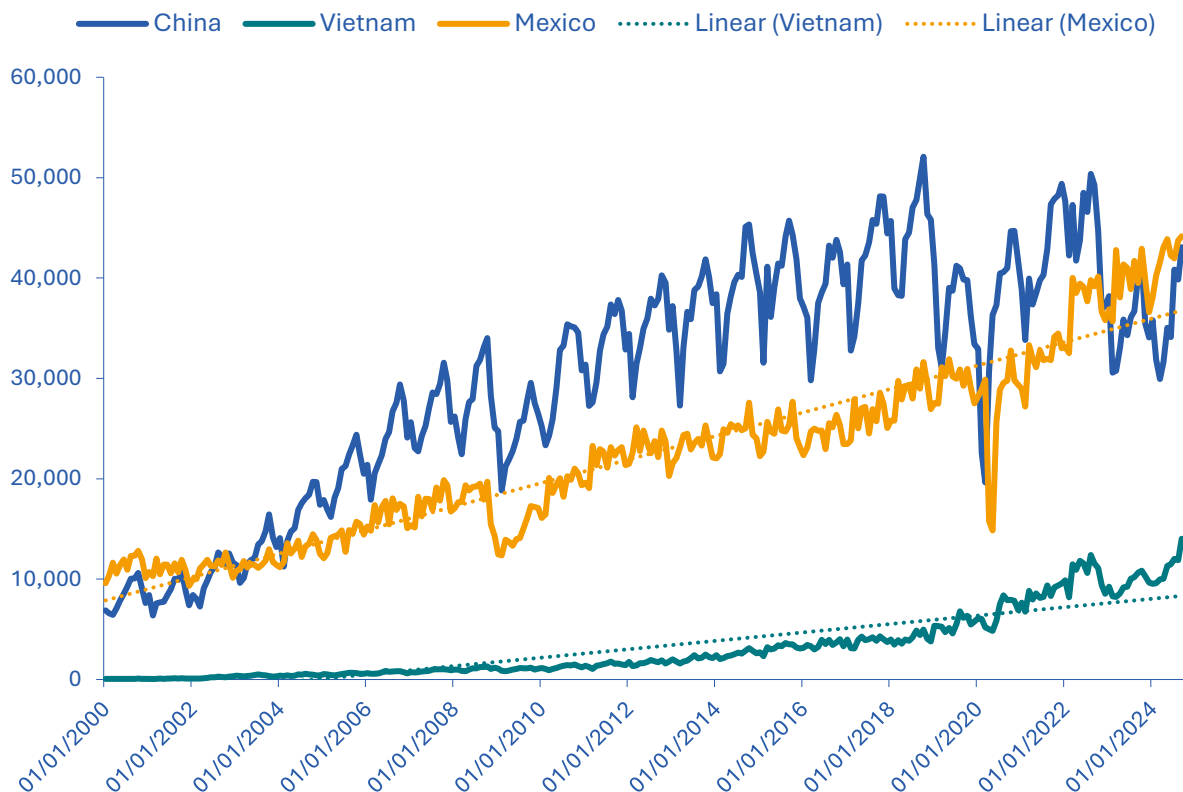

Source: PIIE, BIDV Securities Company (BSC) compiled

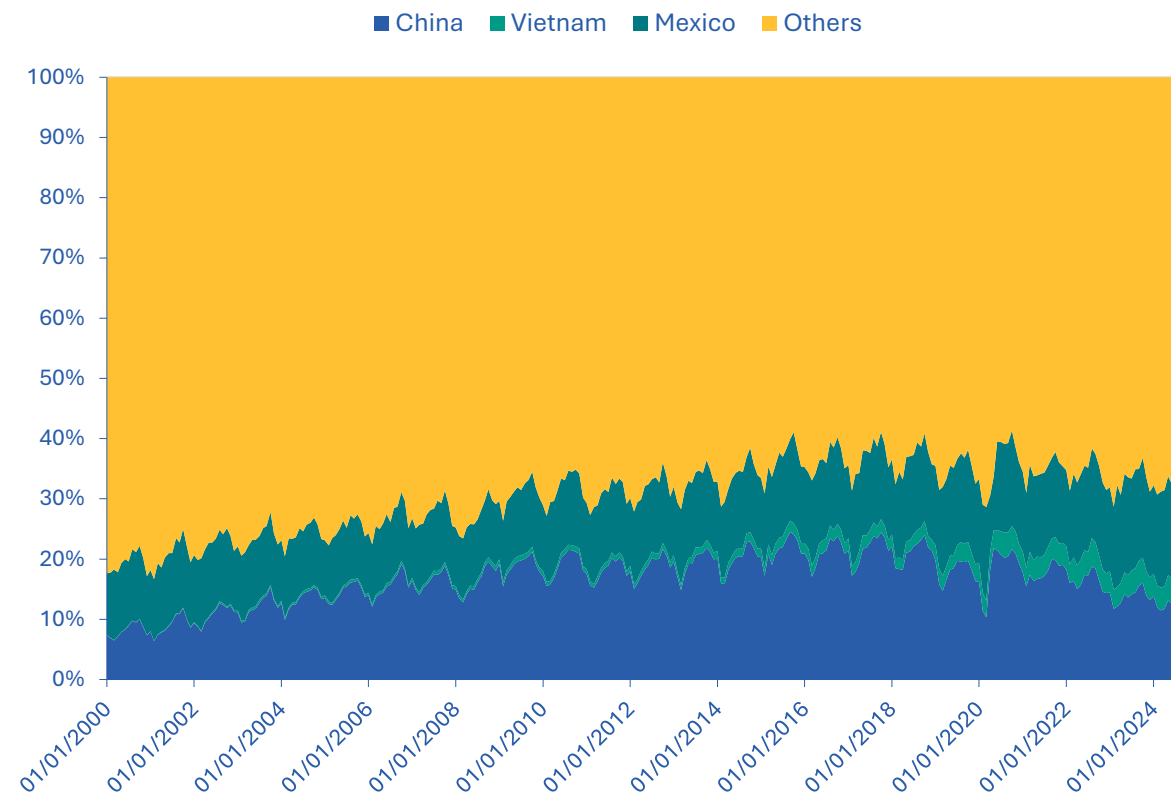

## U.S. Import Value from the Top 3 Trade Surplus Countries

## Share of U.S. Goods Imports by Region

Source: U.S. BEA, BIDV Securities Company (BSC) compiled

- Since the beginning of the trade war, the U.S.-China trade balance has narrowed as direct imports from China declined significantly during the 2018–2020 trade war period.
- While imports from China have decreased, imports from Mexico and Vietnam have been on the rise.
- Specifically, compared to 2018, the total value of U.S. imports in 2024 has increased by 29%, with imports from China declining by 18%, while imports from Vietnam and Mexico have surged by 178% and 47%, respectively. During the 2017–2019 period, the share of U.S. imports from these three countries (China, Mexico, and Vietnam) peaked at nearly 37% of total U.S. imports. By the end of 2024, this share has decreased to 33%.

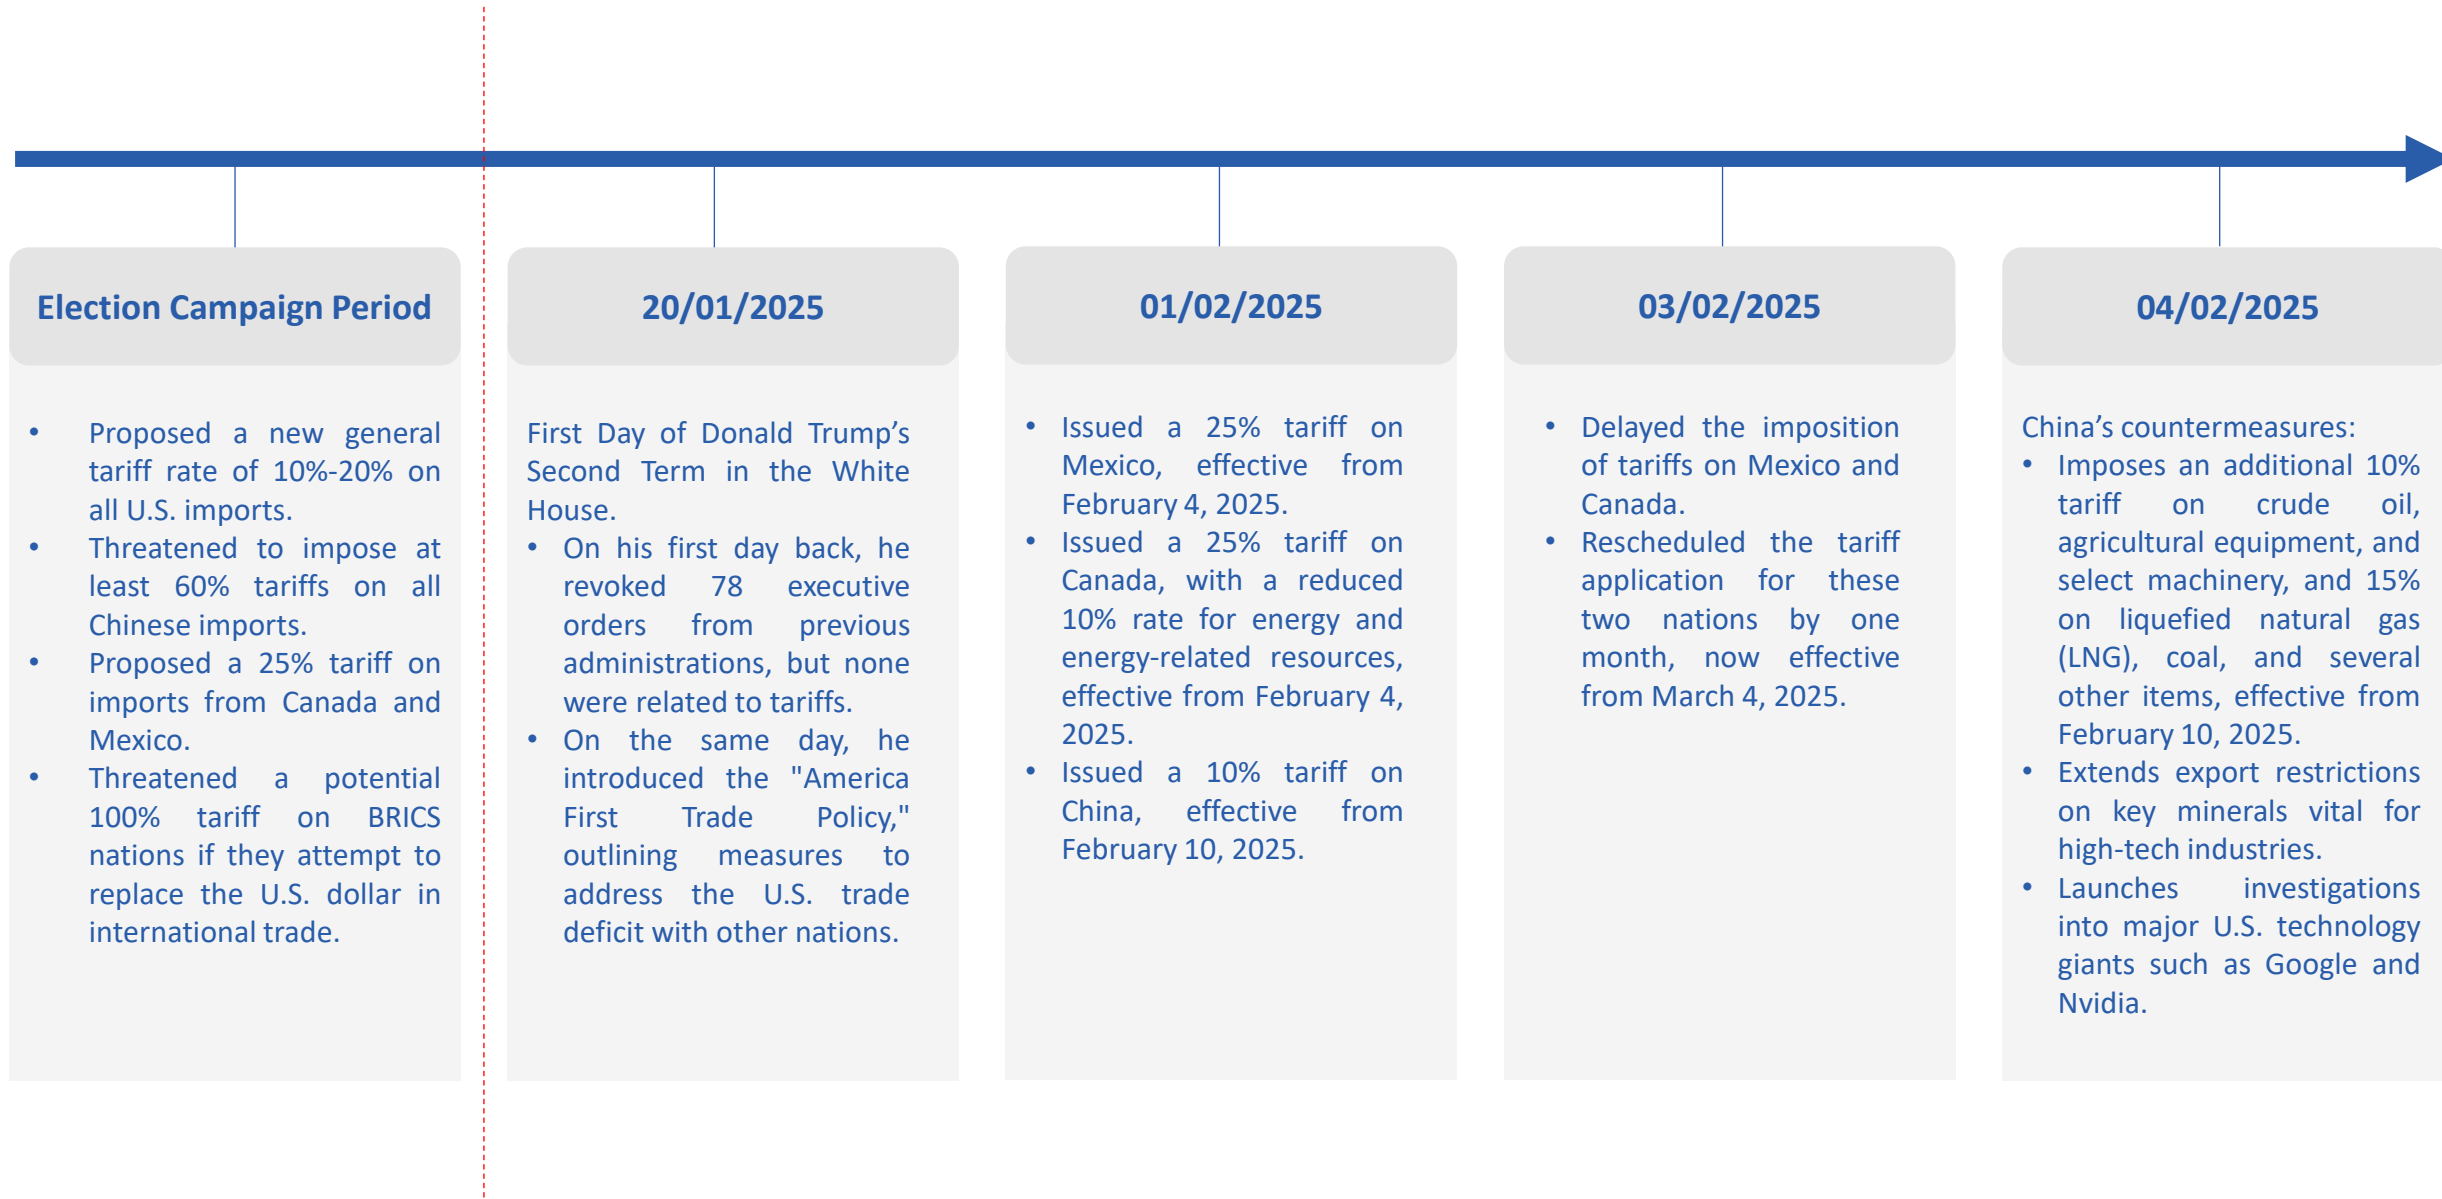

- In China (CN), the stock market reacted with moderate volatility to Trump's initial statements. However, as the trade war escalated, with U.S. trade policy directly targeting China, market sentiment deteriorated, leading to a significant outflow of international capital. From Trump's trade war announcement in March 2018 to the end of 2019, the Shanghai Composite Index dropped by more than 30%. (Table 1: Chinese Stock Market Reaction to Announcements).
- In the U.S., the stock market initially responded relatively calmly to Trump's policies. During the first half of 2018, U.S. equities even posted gains, with the S&P 500 Index rising by over 9% YTD as of September 21, 2018. However, concerns over rising inflation led the Federal Reserve (FED) to raise interest rates, triggering a sharp market downturn after September. By the end of 2018, the S&P 500 had declined by approximately 12%. (Table 2: Stock Market Reaction to Official Announcements).
- After the U.S. imposed tariffs on over \$300 billion worth of Chinese goods, China responded with retaliatory tariffs and decided to devalue its currency in October 2018. The USD/CNH exchange rate, which started the year at 6.3, depreciated to 6.9–7.0, helping Chinese exporters maintain competitiveness.
- China's currency devaluation placed downward pressure on the VND, leading to a 3.2% depreciation, exceeding the government's 2% managed float range. Additionally, the FED's four interest rate hikes in 2018 (from 1.00%-1.25% to 2.00%-2.25%) prompted capital outflows from emerging markets, including Vietnam. These factors were the main drivers behind the sharp decline in the Vietnamese stock market, with the VN-Index dropping by 28%, from 1,215 points (April 2018) to 863 points (December 2018).

**Table 01: Trump imposed tariffs on China for the first time in 2018**

	T-90	T-60	T-30	T-7	T-1	T0	T+1	T+7	T+30	T+60	T+90

## Economic growth

Tariff hikes slow economic growth:

- Increased tariffs raise input material costs, elevating product prices, impacting corporate profits, and hindering expansion plans.
- Higher prices drive up consumer costs, exerting inflationary pressure, influencing short-term economic policies, and contracting overall demand.
- Tariff retaliation negatively affects exports, businesses, and the labor market.

According to Tax Foundation research:

- Tariff hikes may reduce long-term economic output by approximately 0.4% to 1.7%.

## Foreign Direct Investment (FDI)

BSC maintains the view that Vietnam will remain an attractive destination for FDI, as highlighted in our previous reports, due to:

- "China +1" : Supply chain shifts away from China.
- Favorable business environment: Low corporate taxes, stable geopolitical conditions, and extensive bilateral and multilateral trade agreements with key global economies.
- Strategic geographic location along major global shipping routes.
- Major corporate commitments from firms like Nvidia, Amkor, and Hyosung investing in Vietnam.

## Taxation

## Exchange rates

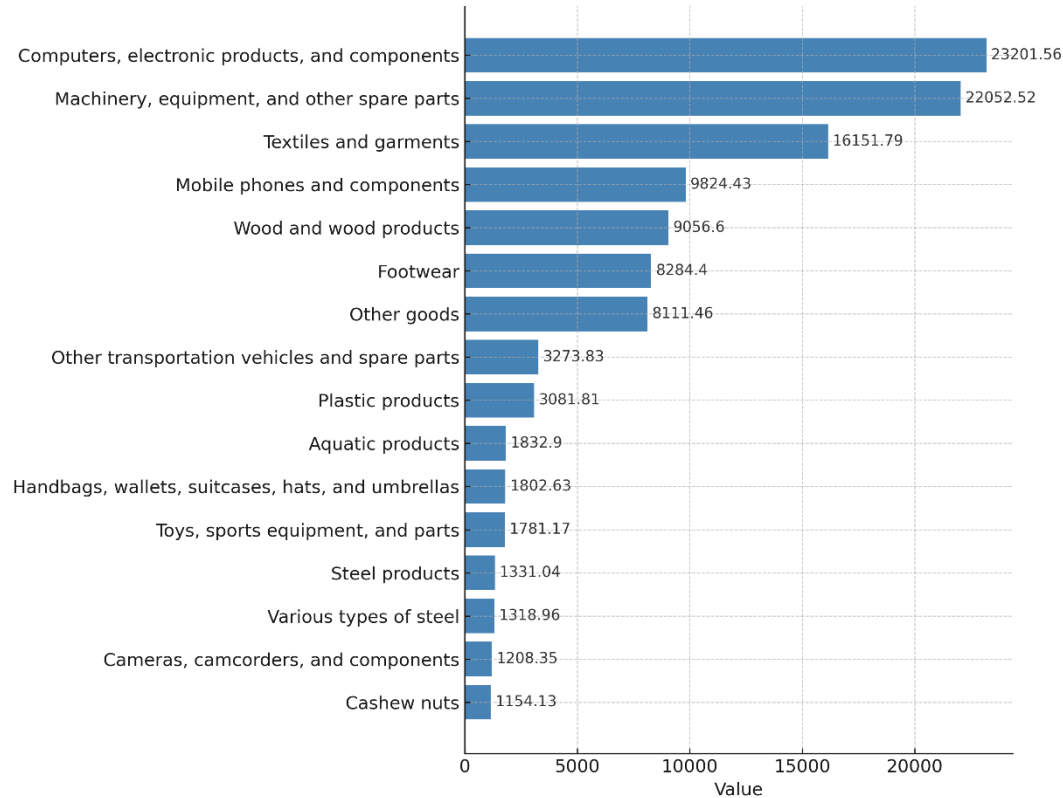

- Tariffs have a temporary impact on inflation, creating short-term pressure on exchange rates. However, in the long run, rising cost-push inflation will gradually be neutralized by declining aggregate demand. As a result, it does not alter the medium-term inflation trajectory, which could lead the FED to adjust its monetary policy direction.
- In recent years, net capital outflows from China have reached record levels, and exchange rates have depreciated significantly. Therefore, China does not need to devalue its currency as it did in 2018 to gain a trade advantage.

## Trade flow

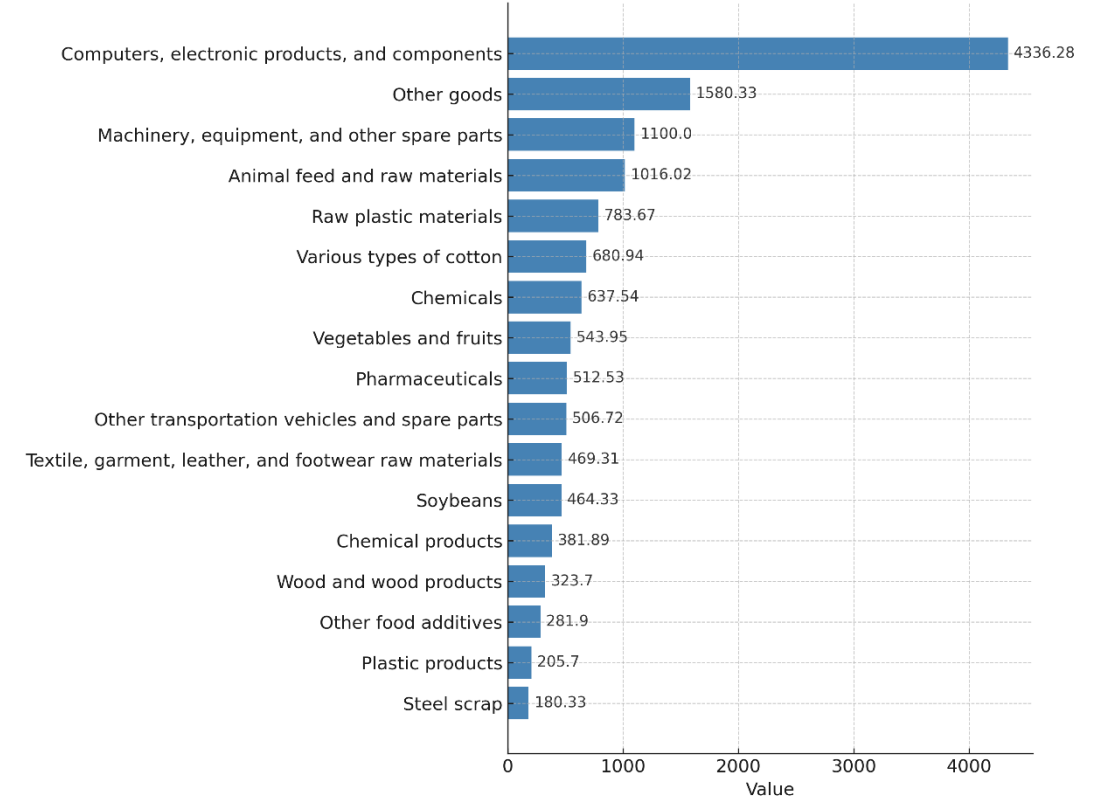

Based on the baseline scenario, we maintain a neutral stance on Vietnam's overall trade outlook:

- Slower economic growth due to the trade war will lead to a decline in aggregate demand, indirectly impacting Vietnam's export sector.
- Compared to the product groups targeted by tariffs during Trump's first term, Vietnamese goods are largely unaffected.
- Vietnam currently holds a Comprehensive Strategic Partnership with the United States.

## Vietnam's Export Items Exceeding \$1 Billion in 2024 (Unit: Million USD)

## Vietnam's Import Items Exceeding 1% of Total Import Value (Unit: Million USD)

Source: TCHQ, FiinPro, BIDV Securities Company (BSC) compiled

- Vietnam has maintained a trade surplus with the United States for many years. In 2024 alone, the surplus exceeded \$104 billion. This is noteworthy if the U.S. expands the trade war and imposes tariffs on countries with large trade surpluses in future rounds.
- Based on the products targeted by Trump's tariffs during his first term, the key items to watch are: (1) Steel and Aluminum; (2) Machinery, Equipment, and Other Spare Parts. Additionally, given the trade surplus nature, Computers, Electronic Products, and Components may also face risks.

- **Impact on Macroeconomy:**
  - ✓ **Trade Impact: (1) Positive:** Amid escalating trade tensions between the U.S. and China, Vietnam may benefit from the shift of manufacturing away from China to other exporting countries, including Vietnam; **(2) Negative:** Vietnam's trade could be negatively affected by Trump's tariff policies on imported goods.
  - ✓ **Short-term Impact on Monetary Policy:** Expansionary fiscal policy under Trump, combined with high tariffs on imports, will lead to rising inflation, resulting in higher interest rates and an appreciation of the USD exchange rate. This could put pressure on the USD exchange rate against other currencies, including Vietnam.
- **Impact on Different Sectors:**

Sector	Extent of Impact	Analysis
Power	Trung bình - khả quan	Power and gas companies may benefit indirectly from <b>lower fuel prices</b> , which would improve their financial health and reduce input costs. EVN will see lower fuel costs, which could help <b>stabilize its finances and reduce expenses</b> .
Oil & Gas	Trung bình	Trump's support for increasing fossil fuel production in the U.S. is expected to <b>boost oil and gas supply and drive down oil prices</b> . Listed oil and gas companies will be indirectly affected by lower oil prices, leading to reduced demand for drilling and exploration.
Import-Export	Trung bình	<p>Textiles &amp; Garments: Currently, Vietnam's textile and garment exports face an average tariff rate of around 4% - 8%. Under Trump's second term, BSC believes these export tariffs will either be <b>maintained or continue to rise</b>, given the growing trade deficit between Vietnam and the U.S. This could somewhat reduce Vietnam's competitiveness compared to lower-cost rivals such as India, Bangladesh, Egypt, etc. However, BSC believes that with advantages such as the ability to produce complex, high-value-added products, compliance with ESG standards, and a stable political environment, Vietnam's textile and garment industry will continue to attract orders—especially as the China+1 strategy gains further momentum.</p> <p><b>Fishery:</b> Pangasius fish is one of the few products currently enjoying a <b>0% export tariff</b> for all three major Vietnamese pangasius exporters (VHC, ANV, IDI). BSC believes this tariff will be maintained in Trump's next term, as Vietnam's pangasius exports are generally not considered dumping in the U.S. market. However, we note that during Trump's previous term, VHC <b>maintained a 0% tariff</b> due to its non-dumping practices. However, the current U.S. anti-dumping investigation and inspection process is expected to be more stringent compared to the previous cycle.</p> <p><b>Wood Products:</b> Exported wood products are primarily subject to <b>anti-circumvention tariffs</b> aimed at preventing goods from being rerouted from China through other countries before being re-exported to the U.S. BSC believes that Vietnamese companies such as PTB and VCS will generally not be significantly affected, as they can fully verify the origin of their products.</p> <p><b>Tires:</b> According to the U.S. Department of Commerce (DOC) ruling in May 2021, Vietnamese tire exporters to the U.S. are subject to <b>anti-dumping and countervailing duties ranging from 6.23% to 7.89%</b>. These tariffs apply to three FDI tire companies, while DRC and CSM are not subject to them. BSC believes that Vietnamese companies such as DRC and CSM can verify the origin of their products, thereby minimizing the impact of potential anti-dumping investigations.</p>
Steel	Tiêu cực	Vietnam's steel industry will face a moderate negative impact as the U.S. begins investigating the origin of imported steel and imposing tariffs on steel from neighboring countries such as Mexico and Canada. This stems from concerns that Vietnamese steel could be rerouted through nearby markets like Mexico and Canada before indirectly entering the U.S. market.
Industrial Real Estate	Trung bình	The " <b>China +1</b> " trend will continue in the near future. Additionally, low electricity costs and efforts to resolve power shortages remain positive factors. However, Vietnam faces several challenges: rising labor costs, less competitive rental prices, and a lack of investment attraction mechanisms following the implementation of the global minimum tax.
Technology	Trung bình	BSC believes that the impact on Vietnam's IT sector will be <b>insignificant and will remain unchanged</b> compared to both Biden's term and Trump's previous term. Vietnamese companies looking to import semiconductor chips from the U.S. will still face strict documentation requirements and rigorous inspection procedures, as the U.S. remains concerned about China transferring data to Vietnam and then re-exporting it.

After his re-election, Trump is said to plan to implement tariff policies directly targeting China (60%) and countries with a large trade surplus with the U.S. (10–20%). BSC offers a **NEUTRAL** view regarding the impact of these policies on Vietnam’s import–export sector, specifically:

- Textile & Garment Sector (Neutral):** We believe that the overall impact of tariff policies on Vietnam’s textile and garment exports will not be significant due to (1) tariffs on Vietnamese textiles are already high (13–15%); however, BSC considers this rate still competitive compared to China (60%) (2) Vietnam is expected to continue benefiting from the shift away from China due to (i) skilled labor, capable of handling high value-added orders (ii) strong ESG compliance, meeting the standards of global brands (iii) stable domestic political environment, creating an attractive investment climate.
- Fishery Sector (Neutral):** Similar to textiles, the overall impact on the pangasius segment is expected to be minimal due to (1) Vietnamese pangasius exporters listed on the stock market continue to enjoy a 0% anti-dumping tax rate in the recent POR20 review, ensuring competitiveness regardless of potential U.S. tariff increases (2) additionally, BSC believes that Vietnamese pangasius exporters to the U.S. will benefit if the U.S. imposes a 60% tariff on Chinese tilapia.
- Wood & Stone Sector (Neutral):** Tariffs imposed on the wood sector are primarily anti-circumvention measures aimed at preventing Chinese products from being routed through Vietnam before re-entering the U.S.; however, with a clear advantage in sourcing raw materials, BSC assesses that the sector will generally not be significantly affected by Trump 2.0.
- Tire Sector (Neutral):** We believe that the impact of tariff policies on Vietnam's tire exports will not be significant due to (1) Vietnam enjoys a countervailing duty (CVD) rate of 6.46% on automobile and light truck tires, which is lower than other countries in the 2021 investigation (2) Vietnamese tire manufacturers have a clear advantage in sourcing domestic rubber and actively cooperate in investigations, reducing the potential impact of Trump 2.0.

Sector	BSC's Perspective	% NPAT 2025F	Factors to Watch	Enterprises' Perspective
Textile & Garment	Neutral	27%	Order Volume Shift from China Following Trump's Tariffs	TNG, MSH: Currently, the impact remains unclear; however, order volumes from brands are still steady and placed early.
Fishery	Neutral	57%	Export Volume of Pangasius After U.S. Tariffs on Chinese Tilapia	VHC: Currently still benefiting from a 0% anti-dumping tax, and since Vietnam is not engaged in dumping, it can stay competitive even if the U.S. imposes import tariffs.
Wood & Stone	Neutral	24%	U.S. Anti-Circumvention Tariffs on Vietnam's Exported Wood Products	Enterprises have not provided specific assessments due to uncertainty.
Tire	Neutral	24%	Export Volume of Tires to the U.S. After U.S. Tariffs on Thai Tires and Anti-Dumping Investigation Results	Enterprises have not provided specific assessments due to uncertainty.

# GLOBAL ECONOMY

## GDP growth in 3 major economies (%YoY)

Note: Dashed line: Average forecast compiled from Bloomberg

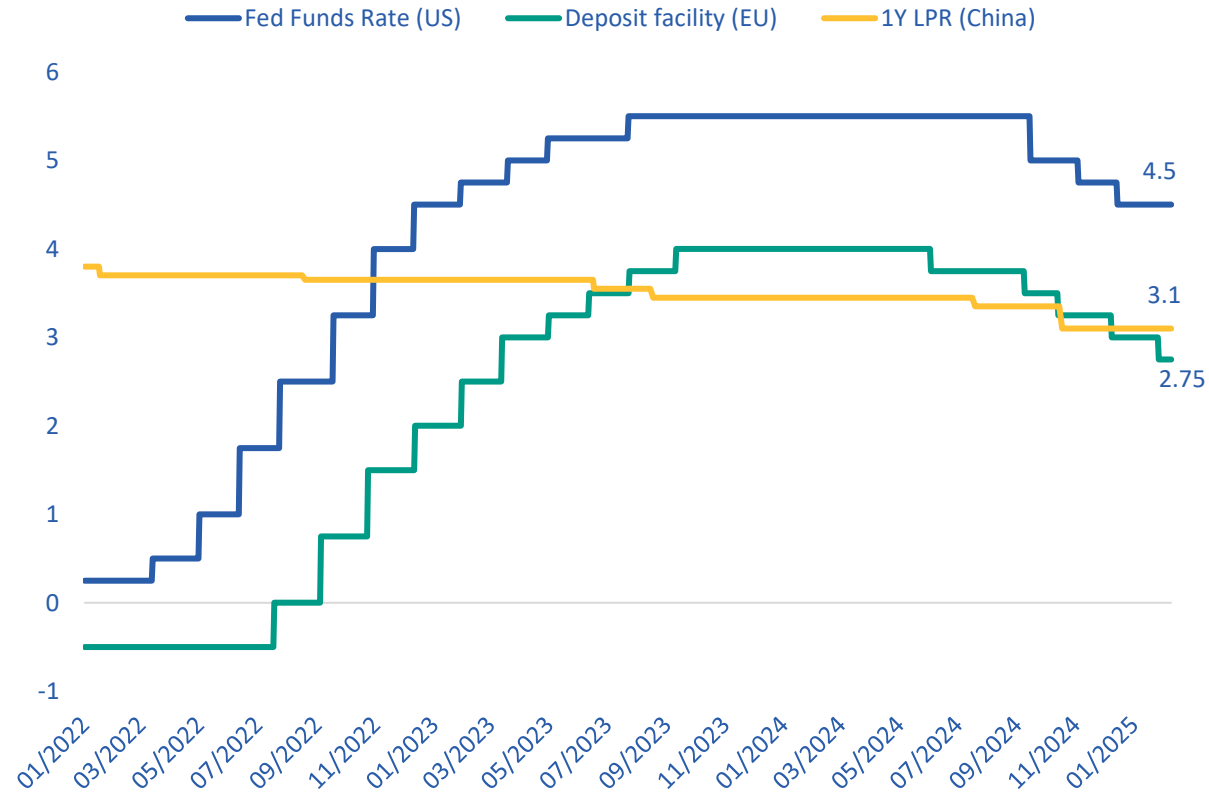

## Some indicators in 3 major economies

Countries	Indicators	11/24	12/24	01/25	2025 (F)	2026 (F)
US	CPI	2.7	2.9		2.6	2.5

- United States: **(1)** Donald Trump's policies officially take effect starting January 20, 2025; **(2)** The U.S. economy continues to contract as a result of tight monetary policy, but overall economic health remains stable.
- Europe: Weak consumer spending; industrial sector contraction; exports show little to no growth and face challenges due to Trump's tariff policies.
- China: **(1)** Weak growth in consumption and exports; the real estate market remains negative; **(2)** Exports are projected to decline in 2025 due to Trump's tariff policies.

## Policies rates in 3 major economies

## Monetary polices: Loosening

Nation	US	EU	China
Monetary policy	Loosening	Loosening	Loosening
Policy rates	4.25%-4.5%	2.75% (deposit facility)	3.1% (1-year LPR)
Stimulus packages	<ul style="list-style-type: none"> <li>End</li> </ul>	<ul style="list-style-type: none"> <li>End</li> </ul>	<ul style="list-style-type: none"> <li>Keep the interest rate for a 1-year loan at 3.1%; interest rate for 5-year loan at 3.6%</li> <li>Many policies and economic support packages.</li> </ul>

Source: BIDV Securities Company (BSC) compiled data from Bloomberg

- United States: **(1)** The Fed maintained interest rates in its January 2025 meeting; **(2)** In the February 11, 2025, testimony, the Fed Chair reaffirmed that there is no urgency to cut rates as the U.S. economy remains stable; **(3)** U.S. CPI rose again in January (driven by housing inflation), combined with Trump's policy direction, leading markets to expect the Fed to keep rates unchanged in the March meeting.
- Europe: The ECB cut interest rates by 25 bps in January 2025, marking the fifth consecutive rate cut. Markets anticipate three additional rate cuts by the ECB in 2025.
- China: Continues to maintain loose monetary policy alongside various economic stimulus measures.

$$\text{GDP} = C + I + G + (\text{EX} - \text{IM})$$

Focus on stimulating

## The 2024 GDP achieved the set objective

## Consumption maintains stable growth rate

Source: BIDV Securities Company (BSC) compiled from GSO

- Q4 2024 GDP growth reached +7.55% YoY; full-year 2024 GDP growth was +7.09% YoY.
- The government has set a minimum GDP growth target of 8% YoY for 2025.
- For 09M2024, total retail sales of goods and services reached 4.70 million billion VND, up 8.80% YoY.
- Retail sales of goods, accounting for 77.1% of the total, reached 3.63 million billion VND, increasing by 7.93% YoY.

## Deposit interest rates inched up slightly, stable at low levels

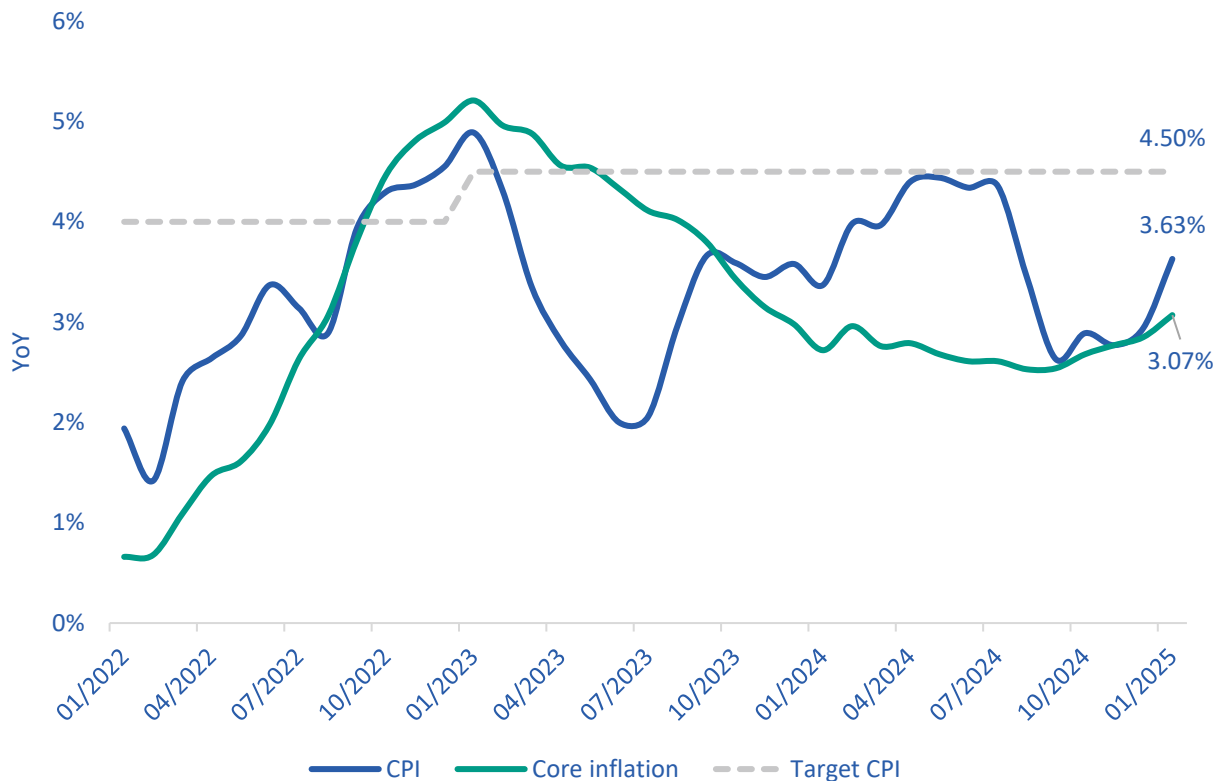

## 2024 Total money supply growth remained low

Source: BIDV Securities Company (BSC) compiled from FiinproX and multiple sources

- Credit growth as of January 2025 reached +0.19% YTD, a low growth rate due to the early Tet holiday.
- Deposit growth in 2024 reached +9.06% YTD (compared to +13.16% YTD in the same period of 2023).
- Total money supply growth in 2024 reached +9.42% YTD (compared to +12.46% YTD in the same period of 2023).
- The upward trend in deposit interest rates has continued since April 2023 as commercial Bankings seek to replenish capital. Conversely, lending rates have remained stable at low levels to facilitate business borrowing.

## Moderate inflationary pressure in 2025...

- SBV January 2025 CPI up 3.63% YoY; core inflation rises 3.07% YoY.
- The sharp increase in CPI in January was driven by **(1)** Higher demand for shopping, dining, and travel during the Tet holiday season and **(2)** New medical service pricing implemented in some localities under Circular No. 21/2024/TT-BYT issued by the Ministry of Health on October 17, 2024.

## ...creates favorable conditions for a loose monetary policy.

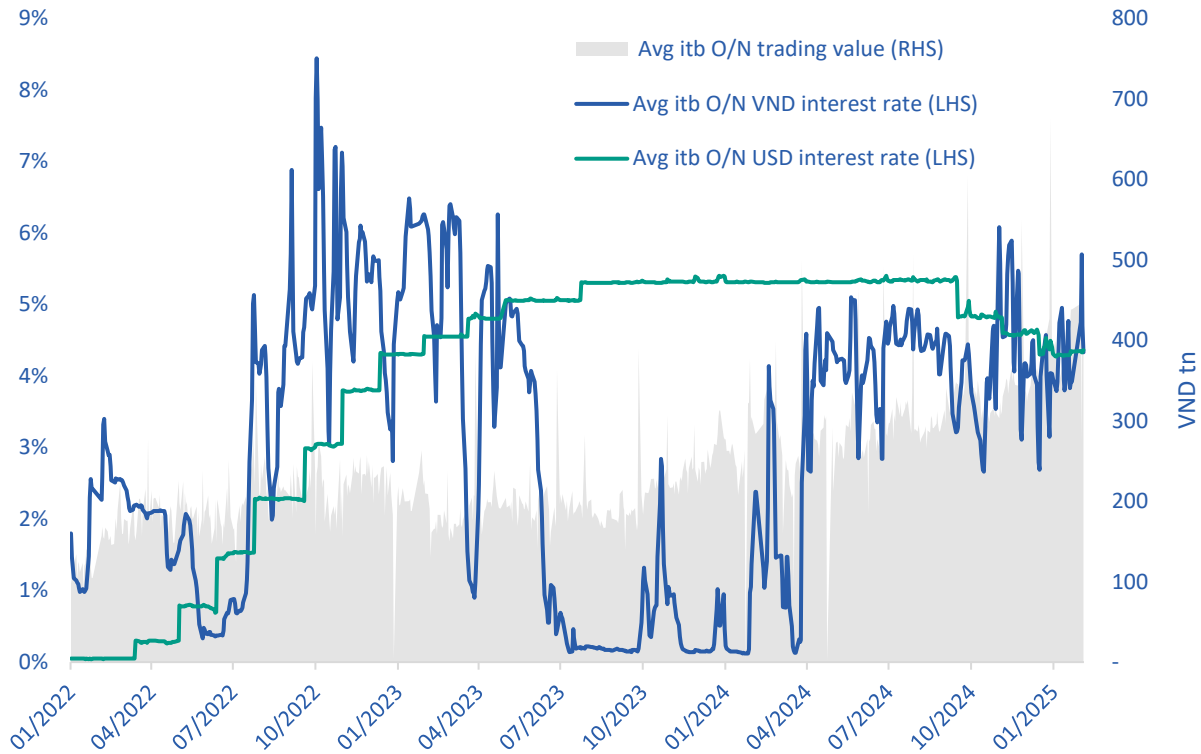

Unit: billion VND

Source: BIDV Securities Company (BSC) compiled from multiple sources

- Inflation remains below the 4.5% target, coupled with moderate inflationary pressure in 2025 (domestic fuel prices are expected to decline in line with global oil prices, and domestic rice prices are decreasing), providing the impetus for the SBV to continue maintaining a loose monetary policy.

## InterBanking interest rates fluctuate sharply

## SBV combines injection and withdrawal in OMOs to regulate liquidity

Note: Data updated as of February 9, 2025

Source: BIDV Securities Company (BSC) compiled from FiinproX, SBV

- SBV continues to flexibly conduct net injections and withdrawals in OMOs. In total, SBV recorded a net value of 77.52 trillion VND in January 2025.
- InterBanking interest rates fluctuated sharply, but the overall trend remained stable within the 4–5% range. The average overnight interBanking rate stood at 4.14% in January, compared to an average of 3.97% in December.

## High disbursement plan for 2025

## State budget revenues and expenditures

Note: Cumulative data compared to the same period (%YoY)

Source: BIDV Securities Company (BSC) compiled from GSO, Fiinprox

- The government is determined to achieve a 95% disbursement rate in 2025 – 857 trillion VND.
- State budget disbursement in Q1 2025 reached 35.417 trillion VND ~ 4.13% of the allocated plan (Q1 2024: 31.119 trillion VND ~ 4.40% of the allocated plan).
- 1M2025, total state budget revenue is estimated at 275.9 trillion VND (+19.44% YoY), equivalent to 14.00% of the annual plan.
- 1M2025, total state budget expenditure is estimated at 134.4 trillion VND (+4.27% YoY), equivalent to 5.30% of the annual plan.

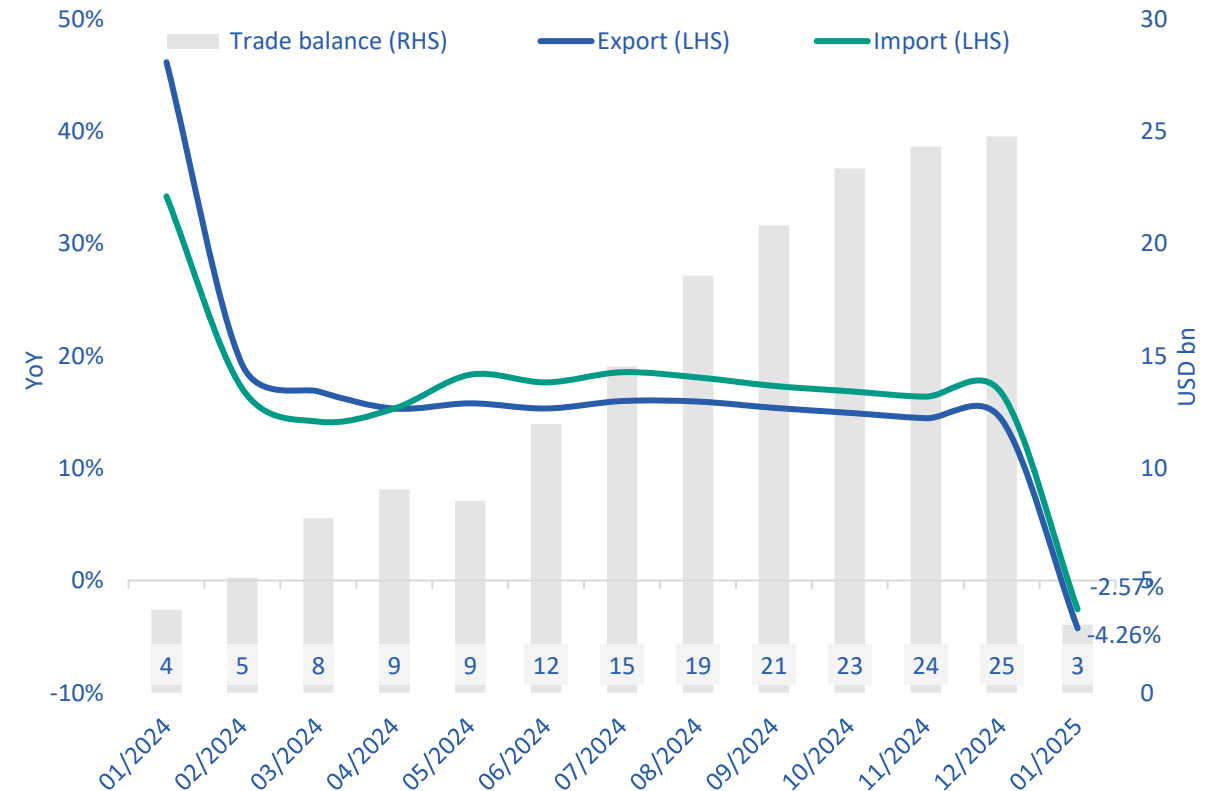

## The exchange rate continues to rise

<b>Average</b>	<b>0.50%</b>	<b>-4.56%</b>	<b>-1.07%</b>	<b>-6.05%</b>	<b>-4.50%</b>	<b>3.54%</b>
VND ranking	1	7	7	2	2	8
FX reserves	86.1	86.1	88	109	95	79

Note: Data updated as of January 31, 2025

- The USD/VND exchange rate cooled down in January; however, it remained at a high level
- Policies under Trump 2.0 pose potential inflationary pressures in the U.S., indirectly pushing exchange rates higher.

## Demand in export markets weakens

Source: BIDV Securities Company (BSC) compiled from Bloomberg, FiinproX

- January 2025, exports decreased by -4.26% YoY, imports declined by -2.57% YoY. The trade balance recorded a surplus of over 3 billion USD.
- January 2025, new export orders also declined. This index has fallen for the third consecutive month.

## FDI flows make a strong comeback at the beginning of 2025

## The PMI has remained below 50 for the second consecutive month

Source: BIDV Securities Company (BSC) compiled from GSO, S&P Global

- 1M2025, FDI accelerated compared to the previous month. Specifically, realized FDI reached 1.51 billion USD, up +2% YoY, while registered FDI reached 4.33 billion USD, up +48.6% YoY.
- FDI primarily flowed into the manufacturing and processing industries, followed by real estate.

- The manufacturing PMI in January 2025 contracted for the second consecutive month, reaching its lowest level since September 2024. This also marks the second month of recorded declines in manufacturing activity.
- Production output and new orders decreased for the first time in four months due to weakening international demand. Work volumes and backlogs declined for the first time in eight months.

## The highest corporate bond maturity value is expected in August 2025

(\*): data includes the value of repurchased corporate bonds

## Accelerating government bond issuance in 2025

Source: BIDV Securities Company (BSC) compiled from Vietnam State Treasury, VBMA

- The total value of corporate bonds issued in December reached 81,227 trillion VND. By the end of 2024, the total value of corporate bond issuance amounted to 447,374 trillion VND, an increase of 42.7% compared to 2023.
- In January 2025, no new bond issuances were recorded.
- The State Treasury plans to issue 111 trillion VND in government bonds in Q1 2025 and 500 trillion VND for the entire year 2025, an increase of 51.3% compared to last year's issuance.

# VIETNAM STOCK MARKET

## VN-Index in January declined slightly by -0.14% MoM.

## Forecast VN-Index 2025

Source: BIDV Securities (BSC)

- At the close of January 24, 2025, VN-Index slightly declined by -0.14% MoM. Before entering the Lunar New Year holiday in 2025, cautious sentiment dominated Vietnam's stock market, reflected in subdued liquidity ahead of the holiday. Factors impacting the stock market in the early months of 2025: (1) Tariff policies under President Donald Trump's administration; (2) The government's efforts to streamline the entire administrative system.
- Alongside these fluctuations, Vietnam's stock market also has supporting factors for the upcoming period: (1) Positive net profit growth in Q4/2024, creating attractive stock valuations; (2) An extraordinary session of the National Assembly with key discussions, fostering long-term growth momentum; (3) Regulatory efforts to implement the KRX trading system. BSC Research forecasts that VN-Index could reach 1,436 points in 2025. (Details in the 2025 Report)

### P/E is discounted by more than 20% compared to the 5-year average P/E.

### P/E of selected countries.

Source: BIDV Securities Company (BSC) compiled from Bloomberg

- At the close of January 24, 2025, the P/E ratio of VN-Index reached 12.25x, decreasing by -13% compared to the end of 2024 and discounted by over 20.7% relative to the 5-year average P/E. The P/E ratio in January 2025 was trading below -1 standard deviation, while the P/B ratio stood at 1.7x.
- Sluggish trading activity in the first month of 2025 led the P/E ratio to return to a low valuation zone. Additionally, positive Q4/2024 earnings growth has contributed to making VN-Index valuations attractive in the medium and long term. VN-Index P/E is projected to move within the 14.5x range in a positive scenario, as the index targets the 1,436-point level.

## Liquidity in January 2025 continues to decline sharply

## Foreign investors maintain net selling position

Source: BIDV Securities Company (BSC) compiled from FiinproX

- 1M/2025 the market remained sluggish, with average trading value reaching 12,825 billion VND per session, down -18.75% MoM. The market continued to face selling pressure from foreign investors, coupled with investors monitoring policy decisions from the Trump administration and rising exchange rate risks, leading to a more cautious trading approach while waiting for new information.
- In January 2025, domestic retail investors recorded a net purchase of 3,059 billion VND, a slight increase compared to the previous month. Meanwhile, foreign investors continued their net selling trend, totaling more than 6,504 billion VND. The Vietnamese stock market followed the broader trend of foreign capital outflows from several Asian countries ahead of the U.S. presidential inauguration. The selling pressure from foreign investors may persist in the coming months as the DXY index remains at a high level.

## Domestic investors opened nearly 81,000 new accounts

## Outstanding margin debt continues to rise

Source: BIDV Securities Company (BSC), FiinproX data updated as of January 31, 2025

- According to VSD, the number of domestic investor accounts increased by nearly 81,000 accounts in January 2025, a sharp decline compared to the last month of 2024. As of the end of January, domestic retail investors had over 9.3 million accounts, representing approximately 9% of the population, achieving the 2025 target ahead of schedule and now aiming for 11 million accounts by 2030.
- Margin debt in Q4/2024 continued to rise, up +9.83% QoQ. The increase in margin occurred amid declining market liquidity, indicating a more cautious sentiment among investors. This trend may partially reflect a shift of some margin funds into other forms of investment, rather than direct market trading.

## M1/2025, foreign investors recorded a net sell of over 6,700 billion VND

## Top Net Foreign Buy/Sell on HOSE in Jan 2025

Source: BIDV Securities Company (BSC) compiled from FiinproX

- After a record net sell-off in 2024, foreign investors continued to maintain their selling momentum in January 2025, with a total net sell value of 6,755 billion VND. The capital outflow trend among foreign investors was also observed in other regional markets during January 2025, such as Thailand (-329 million USD) and Indonesia (-229 million USD). The strong net selling by foreign investors was primarily driven by: high interest rate differentials, global geopolitical tensions, and risks associated with U.S. tariff policies. Outlook for Foreign Investment Inflows in 2025: macroeconomic recovery and growth, stable interest rates and controlled inflation, potential market reclassification and upgrade expectations
- . Top Net Bought Stocks by Foreign Investors in January 2025: HDB, LPB, VGC. Top Net Sold Stocks by Foreign Investors in January 2025: PDR, DXG, PC1.

## ETF funds continue to record net outflows of -24.81 million USD

## Domestic ETFs (-\$1M) and foreign ETFs (-\$13.81M) recorded net selling

Source: BIDV Securities Company (BSC) compiled from Bloomberg

- Foreign ETFs:** In January 2025, foreign ETFs recorded a net outflow of 23.8 million USD, with the main withdrawals coming from ETF VNM (-16.68 million USD), ETF FTSE (-3.48 million USD), and Fubon (-2.29 million USD). Notably, ETF Fubon showed signs of slowing its net outflow trend during the month. Overall, most foreign ETFs remain in a discounted state, suggesting that the outflow trend may continue into February 2025.
- Domestic ETFs:** Reversed to net outflows in January 2025, with ETF Diamond continuing to record a net inflow of over 2 million USD, while ETF E1 experienced the largest net outflow of 4.84 million USD. In total, domestic ETFs recorded a net outflow of 1 million USD in January 2025.

## Warrants Market

## Futures Market

Source: BIDV Securities Company (BSC) compiled from FiinproX

- The average trading value in the derivatives market in January 2025 reached 24,176 billion VND, increasing 4.91% compared to the December 2024 average. Open interest (OI) volume in November decreased by 5.51% compared to January. Proprietary trading in derivatives by securities companies slightly declined compared to the previous month, accounting for 2.13% of the total market.
- CACB2403 and CACB2403 were the two covered warrants with the most attractive premium levels as of January 24, 2025. By the end of January 2025, the number of derivatives trading accounts reached 1.89 million, an increase of 0.92% compared to the end of December 2024.

## The Industrial Goods & Services sector had the highest performance in January 2025

## Net buying/selling value of investor groups on HSX in January 2025
