## Vietnam Daily Monitor

### Foreign investors return

#### BSC's Forecast on the stock market

	Negative	Neutral	Positive
Day 31/7/2015			•
Week 27/7-31/7/2015		•	
Month 7/2015			•

### Summary

The market showed more positive signals than previous trading days, in part due to positive news from FOMC results yesterday which supported foreign capital flows return to the market. The indices closed high and market breadth had positive improvement.

### Recommendation

Negative signs in previous sessions diminished as foreign investors returned to the market. The index is expected to fluctuate and accumulate in the next sessions

Investors may consider raising their stock holdings proportion is case foreigners were net buyers again. If there is weak demand and foreign investors turn to sell off, investors should preserve funds and stay for more market observation.

## Market highlights

Speculative stocks rallied well, notably HAR, VHG and OGC.

Market breadth was positive with 208 gainers / 157 losers on both exchanges.

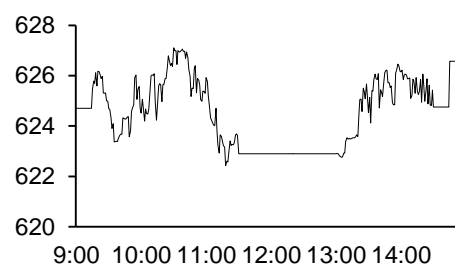

Foreigners turned to be net buyers with net value of VND 30 billion.

## Recommendations

Vietnam market has still experienced a shake as previously discussed. In the context that foreigners stopped to buy, domestic investors became more cautious, which made numerous shares accumulate and market liquidity deteriorate. This scenario could repeat tomorrow and end in next week end if foreigners have clearer trading activities.

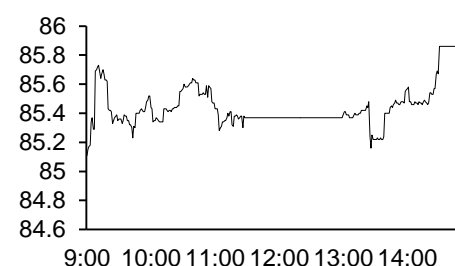

Investors may consider raising the proportion of shares in the portfolio in the case that foreigners back to buy. On the other hand, investors should continue to stay out of the market and wait for other buying point.
