Vietnam Daily Monitor

VN-Index to retest the 600-point support (2)

BSC's Forecast on the stock market

	Negative	Neutral	Positive
Day 19/11/2015	•		
Week 16/11-20/11/2015	•		
Month 11/2015			•

Summary

The market traded in a balanced way on Wednesday, there are no shares presenting the leading role. Foreigners have been net sellers for six consecutive sessions on HSX.

Recommendation

The market continued correcting slightly in the context that some blue-chips temporarily lose their rising momentum. Selling pressure of foreigners can make the market continually decline in the next sessions.

Risk-seeking investors can take positions when VN-Index fall to the support level of 595-600 points and consider quickly cutting loss if this index break down with large volume.

Research Analyst truongnq@bsc.com.vn

Market highlights

Foreigners have been net sellers for six consecutive sessions on HSX. The market breadth was fairly balanced with 194 advancers / 214 losers on both exchanges.

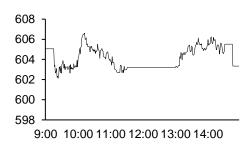

Some stocks surging significantly on price and volume are TTB (+ 9.6%), SHA (+ 9%), SHI (+ 6.9%) and LHG (+ 6.8%).

Recommendations

The market continued correcting slightly in the context that some bluechips temporarily lose their rising momentum. Technically, the VN-Index is re-testing the support level of 595-600 points. Recall that this level is quite solid, and this index will not easily break down this point. A negative sign is that foreigners still sold out on the HSX, and this selling pressure can make the market continually decline in the next sessions.

Risk-seeking investors can take positions when VN-Index fall to the support level of 595-600 points and consider quickly cutting loss if this index break down with large volume.

Technical views

VN-Index is entering a short-term downtrend because the MACD line has crossed down its signal line. However, because MACD is declining slowly and the RSI value is around neutral zone 50, selling pressure may not be too strong. Therefore, the market will more likely to have a technical rebound when the VN-Index fall to the support level 595-600 points.
