BSC's Forecast on the stock market

	Negative	Neutral	Positive
Day 26/1/2016			•
Week 25/1-29/1/2016			•
Month 1/2016	•		

Summary

The market rebounded strongly after a few rumors about the list of elected members of the Central Committee XII. This is the strongest recovery since the beginning of 2016 until now. Green color cover electronic board, in which various stocks hit the ceiling. Foreigners were net sellers on the HSX, mainly on VIC and HAG, while net buyers on HNX and UPCOM.

Recommendation

Today session show the bright prospect for the week that is forecasted in our report last week. The bull is probably dominant in the next session with a lower increase margin.

Investors who successfully call the bottom should take advantage of gain sessions to lower share proportion. Investors holding more cash should not buy stocks at high prices in the strong gains.

Market highlights

Vietnam market recovered strongly with a total of 112 stocks hitting the ceiling on both exchanges.

Foreign investors remained net sellers of VIC and HAG.

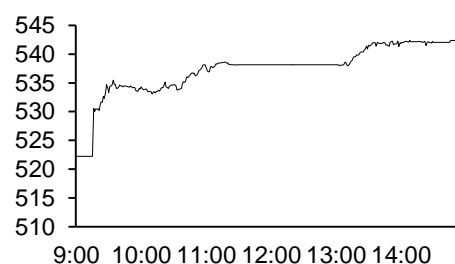

Oil & Gas stocks (PVC and PVD) continued rising significantly due to the recovery of oil prices.

Recommendations

As previously mentioned, we believe that bottom fishing has been stronger as VN-Index fell again nearly 511 points on last Friday, helping the market to bottom successfully. In today session, VN-Index recovered strongly as increasing nearly 4% and trading volume on both exchanges also rose by 33% compared to previous trading session, which suggest that this recovery will not soon end. Technically, RSI indicator of VN-Index shown a reversal signal when crossing above 30 after falling into oversold zone. Therefore, although reaching resistance at 543 points now, VN-Index is still able to maintain increasing momentum at least tomorrow.

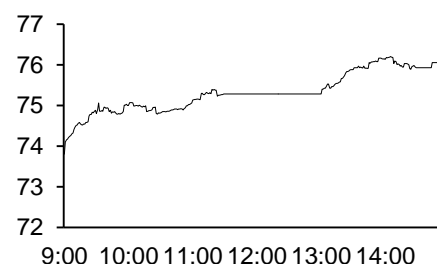

Investors who successfully call the bottom should take advantage of gain sessions to lower share proportion. Investors holding more cash should not buy stocks at high prices in the strong gains.
