## Vietnam Daily Review

The market continues sideways

BSC's Forecast on the stock market

	Negative	Neutral	Positive
Day 31/3/2016	•		
Week 28/3-1/4/2016	•		
Month 3/2016			•

### Summary

The rally of VNM helped VN-Index to close in green, while HNX-Index and Upcom-Index declined at the ATC session. Foreigners were net buyers on both exchanges.

### Recommendation

The divergence is expected to continue occurring when the news from the shareholder meeting will help some stocks with good earnings gain. However, the opportunity for VN-Index breaking out the strong resistance level of 580 points is still not great when cash flow has not improved drastically.

Investors consider reducing the proportion of stocks when VN-Index rises nearly the resistance level of 580 points and venture buy if VN Index maintains the support level of 560 points in the technical corrections.

**Market highlights**

The rally of VNM helped VN-Index to close in green, while HNX-Index and Upcom-Index declined at the ATC session.

Foreigners were net buyers on both exchanges.

Some stocks surging significantly on price and volume in this session today were NDF (+10%), VGS (+7.2%), DHP (+7%) and EVE (+6.9%).

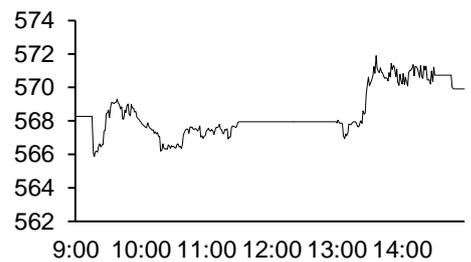

**Recommendations**

Without gaining of VNM, the index dropped points today, continued to mark a technical correction. Even though, the support level of 560 points is still not broken, so the state of selling-off is not occurred. The divergence is expected to continue when the news from the shareholder meeting will help some stocks with good earnings gain. However, the opportunity for VN-Index breaking out the strong resistance level of 580 points is still not great when cash flow has not improved drastically.

Investors consider reducing the proportion of stocks when VN-Index rises nearly the resistance level of 580 points and venture buy if VN Index maintains the support level of 560 points in the technical corrections.
