VN-Index to fluctuate around 600

BSC's Forecast on the stock market

	Negative	Neutral	Positive
Day 6/5/2016	•		_
Week 2/5-6/5/2016			•
Month 5/2016			•

Summary

VN-Index rose above 600 in the beginning of trading day thanks to VIC. Despite the strong pressure from profit realization, VN-Index still closed higher than 600 due to the increase of banking sector. Foreign Investors remained net buyers on VN-Index and Upcom but net sellers on HNX.

Recommendation

The VN-Index has reached 600 points thanks to the significant increase of VCB. It can be seen that selling pressure has become stronger when VN-Index rose sharply today because 600 pts is a solid resistance level. After led by real estate and steel stocks, VN-Index is now driven by textiles today. We believe that a technical correction may occur in short term, which cause VN-Index to retest 600 points and then break up in spite of the unimproved market's liquidity.

Investors may consider taking profit in the coming sessions, reallocate portfolio in case of market correction and especially avoid buying high.

Market highlights

Textile stocks rose sharply today.

Foreign investors remained net buyers on both exchanges.

Market breadth was balanced with 206 advancers / 226 decliners on both exchanges.

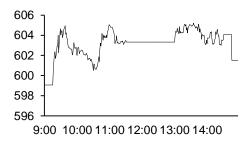

Recommendations

The VN-Index has reached 600 points thanks to the significant increase of VCB. It can be seen that selling pressure has become stronger when VN-Index rose sharply today because 600 pts is a solid resistance level. After led by real estate and steel stocks, VN-Index is now driven by textiles today. We believe that a technical correction may occur in short term, which cause VN-Index to re-test 600 points and then break up in spite of the unimproved market's liquidity.

Investors may lower the proportion of gainers in the rallies and consider recovering in the technical correction.

Company updates

CVT - CMC Jsc. (HNX)

2016 Business Plan:

CVT plans to produce and sell 13 million m2, achieving revenues of VND 1200 billion(+66.7% compared to 2015 Rev), EBT of VND 120 billion (+50% compared to 2015 EBT). Expected dividend in 2016 is 25-30%. Under this plan, EAT will be VND 96 billion, EPS of VND 4,665 per share (based on 19.2 million shares outstanding), equivalent to P/E of 5.6x (calculated at the closing price of 26,200 VND/cp on 05 May).

Growth came mainly from (1) CMC 2 plant - Phase 2 which will operate more steadily since 2Q2016 (Design capacity of 5 million m2 per year), increasing production capacity by 50%; (2) cost savings by changing raw material mixing and storing materials at low prices.

Approving CMC 2 plant expansion, with two options: (The plan will be implemented in 2016 or move to 2017, depending on market condition):

Option 1: High-grade ceramic production line with design capacity of 6-8 million m2 per year (current CSTK 15 million m2 / year). Estimated construction for 1 year (Q3 / 2016-Q3 / 2017). The total investment of 350 billion, of which 144 billion from the issuance to existing shareholders, 206 billion from bank loans.

Option 2: The production line equipment porcelain (sp capacity of about 10 million / year) or sanitary (capacity of 1-2 million products / year). Total investment chain \sim 50-200 billion, depending on the company and type of product produced

Increase the percentage of foreign ownership to 100%. Currently, foreign ownership in CVT is 8.6%, held mostly by institutional investors. Issue ~ 960,000 share under ESOP program (equivalent to 5% of the shares outstanding), the expected issue price is VND 15,000 per share, no transfer restrictions. CVT scheduled to release in 3Q2016 - 1Q2017.

Issue 9.6 million shares to existing shareholder, equivalent to the ratio of 2:1, expected in 2016-2017. Offering price is VND 15,000 per share, aims to invest in the CMC 2 expansion plan.
