## Market outlook

VN-Index gained in the morning because of the strong buying force on real estate and banking codes like VHM, VIC, VRE, BID and VCB. In the afternoon, the gaining trend was reduced by the strong selling on petro codes like POW, PLX along with the buying dropped on codes like BID, VCB, VRE. Foreign investors were net buyers and liquidity decreased compared to the previous session. In BSC's view, although liquidity has decreased compared to yesterday's session, the market sentiment is still very optimistic. However, investors should still monitor the US-China trade negotiations to decide whether to increase or decrease the stock rate in the portfolio.

## Technical Analysis

SBT\_Correction

Technical highlights:

- Current trend: Correctopm
- MACD trend: Positive divergence, MACD is crossing down the signal line.
- RSI: Neutral zone, down trend.
- MA: 3 MA lines are increasing slightly.

**Outlook:** SBT is in the correction phase from the resistance range 21-21.5. The liquidity in the correcting sessions remained above the 20-day average, showing that the correcting momentum is still quite strong. RSI and MACD indicators support a short correction. RSI indicator dropped deeply while MACD is about to cut down signal line. The movement of 3 MA lines has not yet reflected the downward trend. The buying position is not clear. The stock will correct to the strong support level at 20. If SBT falls below this price level, SBT may return to the price range of 18.8-19.
