#### Chart (1 year)

**Overview:** FPT is the leading technology company in Vietnam with more than 30 years of experience. After withdrawing from Retail and Distribution Sector, the company focused on Technology, especially Software Exporting.

#### Valuation

We continue to recommend **BUY** for FPT stock with a new target price of VND 60,700/share (down 13.6% compared to the latest target price) based on PE / FCFF method at the proportion of 40%/60% (PE fw = 11) due to (1) lower the 2020 business result due to negative impact of Covid – 19 (2) lower target P/E for FPT stock to 11 from 13.

#### 2020 Business plan

In 2020, FPT plans revenue and PBT are at VND 32,450 billion (+ 17% YoY) and VND 5,510 billion (+ 18% YoY) respectively.

#### 2020 BSC Business forecast

BSC forecasts that FPT's 2020 net revenue and profit PBT will be VND 31,805 billion (+ 14.7% YoY) and VND 5,321 billion (+ 14.1% YoY). EPS FW 2020 is 4,837 VND/share (+14% YoY) (deducted from bonus and welfare fund)

#### Catalyst

- SCIC divests from FPT

#### Company update

On 8/4/2020, BSC participated in online 2020 AGM of FPT. The BOD answered questions related to impact of Covid-19 and Digital Transformation strategy.

- (1) Impact of Covid-19: Outsourcing segment is to grow mildly in Q2.2020 ( CAGR in 2015 – 2019 was 21.5%/year). However, with solid financial base and large customers, FPT is strong enough to withstand the difficult time ahead.
- (2) Digital Transformation Strategy of FPT

Moreover, there are some important informations: (1) ESOP issuance for managers and employees, (2) 2020 dividend policy: 20% cash dividend (10% cash dividend and 15% stock dividend are to implement in June 2020).

## FPT Joint stock company

On 8/4/2020, BSC participated in online 2020 AGM of FPT, most of questions focused on the impact of Covid – 19 and Digital Transformation Strategy. BSC notes the following points:

### (1) Impact of Covid -19 pandemic on FPT's business activities:

FPT has prepared for different scenarios dependent on Covid-19 pandemic progress. The company focus on cutting short term investment cost, indirect expense while shifting to working online in all divisions.

However, negative impact of Covid – 19 becomes clearer when FPT announces that Software outsourcing division's new KPI in Q2.2020 has to decreased by 15% compared to the old one and company predicts a mild growth of this division in the next quarter (historical CAGR in the period 2015 – 2019 was 21.5%/year). As Software outsourcing accounts for 39% of revenue and 37% of PBT in 2019, investors should be expected to observe a slowest quarter growth under Covid-19 crisis.

We are concerned that challenges not only comes from the short-term impact (social distance discourages bidding progress, developing new customers; cutting budget of clients) but also comes from risk of recession of global economy while 41% revenue and PBT of FPT are from foreign markets.

However, we are confident that FPT are strong enough to withstand the difficult time ahead:

**(a) Strong financial position:** current ratio of FPT is better than industry median thanks to high cash and cash equivalents. BSC has stressed test the company with the assumption that are no revenue and cashflow created but company still has to pay 50% operating expense (exclue depreciation), interest expense and payables in 2020. The result shows that FPT is able to stand in 2 quarters.

**(b) Majority of clients are large corporates which have high chance to survive amid Covid-19 crisis.** Currently, with a total number of 720 customers FPT provides services in 2019, 44% of revenue comes from companies which are included in Fortune Global 500.

BSC expects that when the pandemic ends, the growth will bounce back to normal level and new opportunities will open thanks to (1) changing working behaviors will encourage IT investment (2) FPT gain market shares from competitors.

## (2) FPT's Digital Transformation Strategy

BSC continues to believe that Digital Transformation is major growth driver when DX projects record a faster growth and higher gross margin than traditional projects. In 2019, FPT had taken actions to push DX division:

- (a) Increase DX workforce (+132% YoY compared to 7% growth of total IT workforce)
- (b) Encourage "made by FPT" products (ex: AkaBot) which apply Big Data, AI,...
- (c) Sign contracts with large local companies to implement DX activities (ex: Minh Phu Seafood Corporation). FPT will be responsible for applying technology in the supply chain (1) forecast shrimp volumes and quality (2) increase factories' efficiency (3) automate and connect different departments in supply chain

**(3) Other important informations****(a) ESOP issuance for managers and employees:**

It is worth noting that ESOP for managers which last until 2026 has the restriction of transfer of 10 years - a quite long time on Vietnam stock market.

The maximum number of ESOP shares allowed to be issued in 1 year is 0.75% of total issued stock shares (~ 5.1 million shares). At a price of 46,400 VND/share ( Closing price on April 10, 2020), the estimated ESOP cost is VND 237 bil, equal to 6% of the NPAT for 2019.

**(b) The 2020 cash dividend policy is expected to be 20%:** FPT has just approved the payment of 10% cash dividend and 15% stock dividend of 2019 in June 2020.

**(c) FPT's expected investment costs in 2020 increase sharply**

BSC believes that (1) the impact of the nCoV epidemic; (2) company intention to cut cost and (3) actual costs are historically lower than plan, actual disbursements in 2020 are difficult to reach the expected levels.

However, BSC are concerned that the expected investment cost for the Technology sector increased sharply (+ 111.8%) for 2020 (probably to serve the expansion of the operating office for IT workforce). BSC will update further details of investment projects in the following reports.

	2016	2017	2018	2019	2020F	YoY
<b>Annual total investment expense</b>	<b>1,317</b>	<b>1,105</b>	<b>2,454</b>	<b>3,239</b>	<b>4,710</b>	<b>45.4%</b>

**(4) 2020 BSC Business forecast:** We assumes that 2020 growth will be negatively impacted due to Covid - 19 before returning to normal level in 2021.

BSC forecasts that FPT's net revenue and profit after tax in 2020 will reach VND 31,806 billion (+ 14.7% YoY) and 4,459 billion (+ 14% YoY) based on the assumption:

## FPT Joint stock company

- Software exporting major markets record slower grow: Japan market reaches VND 6,309 billion (+14% YoY); European market reaches VND 1,183 billion (+20% YoY) and US market reaches VND 3,206 billion DT (+ 20% YoY).

- Telecommunication Services sector reaches revenue of VND 10,752 billion. The Online Advertising sector decreases by 12% amid companies cutting budget for marketing and advertisement.

- Gross profit margin is expected to increase slightly to 39.0% from 38.6% thanks to an increase in the proportion of projects related to Digital Transformation and increase in labor productivity (however, the gross margin of 38.8% is lower than the latest gross margin forecast which is 39.0%)

- FPT's SG&A expenses margin in 2020 reaches 23.7%.

## FPT Joint stock company

**+ PE Valuation:** Compared with the previous update report ([Link](#)), BSC downgrade the target P/E in 2020 to 11 from 13 due to (1) Covid-19 impact discourage the bussiness growth (2) rising uncertainty of global economy, which may worse the demand pf FPT's products.
