Market outlook

Stock market: VN-Index maintained a sideways trend throughout the session. Foreign investors continued to be net sellers on HOSE and net buyers on HNX. Investment cash flow weakened when only 8 out of 19 sectors gained. The narrow fluctuation range, positive market breadth and declining liquidity indicated that the VN-Index's rally was cooling down. BSC recommends investors to limit transactions and wait for short-term movements of the market during this week.

Future contracts: All future contracts increased following VN30. Investors might consider selling with target price around 890 points for short-term contracts.

Covered warrants: In the trading session on October 19, 2020, majority of coverred warrants decreased, while underlying securities diverged in terms of price. Trading value decreased.
