BSC's Forecast on the stock market

Day 3/11/2020		•	
Week 2/11-6/11/2020		•	
Month 11/2020		•	

### Market outlook

**Stock market:** After a period of strong correction, the market has shown signs of recovery. Cash flow investment returned to the market with 16/19 sectors increasing. Liquidity plummeted, amplitude narrowed and market breadth was positive, showing that the market prices of some stocks have returned to an attractive level which are attracting investors' cash flows. However, the fact that foreign investors continued to be net sellers on both HSX and HNX is still restraining the market's upward momentum. With a movement like this, VN-Index is likely to retest the threshold of 940 points before forming a new trend in the short term.

**Future contracts:** All future contracts increased following VN30. Investors might consider buying with target price around 910 points for long-term contracts.

**Covered warrants:** In the trading session on November 02, 2020, majority of covered warrants increased following underlying securities. Trading value decreased strongly.
