Market outlook

Stock market: After a series of strong rally sessions, the market had a strong corrected session with red color covering the market from the morning session to the afternoon session. Investment cash flow declined with all sectors dropping. Market liquidity decreased slightly, market amplitude widened and market breadth was negative, reflecting panic sell-off sentiment due to short-term profit-taking pressure after a series of prolonged gaining sessions. During today session, the market once fell by nearly 3% but quickly recovered and only decreased by more than 1% at the end of the session. This phenomenon shows that the smart investors is still catching the bottom price of fundamental stocks in this strong corrected session. BSC expects the market to return to the 1,080--1,100 point range next week.

Futures: All future contracts decreased following VN30. Investors might consider buying with target price around 1065 points for long-term contracts.

Covered Warrant: In the trading session on December 24, 2020, majority of underlying securities decreased, while coverred warrants diverged in terms of price. Trading value increased strongly.
