#### Market outlook

Stock market: The strong uptrend of the VN-Index cooled down in today session. Investment cash flow shows signs of slowing down when the market had only 9 out of 19 sectors gaining points. Liquidity fell sharply, market amplitude narrowed and market breadth was balanced, showing that trading activities are weakening before the Lunar New Year holidays. Foreign investors continued to be net buyers on both HSX and HNX. BSC expects that the market will not have big fluctuations before the holiday as investors focus on preparing for the incoming holidays.

Future contracts: All future contracts increased in agreement with the general trend of the index. Investors can consider selling with the target price around 1030 points for short-term contracts.

Covered warrants: In the trading session on February 04, 2021, majority of coverred warrants decreased following underlying securities. Trading value increased.
