Market outlook

Stock market: The VNIndex was in the red for most of the trading time and is now back to nearly 1160. In the market, investment cash flow declined and only 5 out of 19 sectors gained. In addition, foreign investors are still net sellers on both HSX and HNX. Besides, market breadth turned to negative but the liquidity was not much different from the previous session. According to our assessment, VN-Index is likely to struggle in the 1150-1170 zone in the next few sessions.

Future contracts: All future contracts decreased following VN30. Investors might consider selling with target price around 1150 points for short-term contracts.

Covered warrants: In the trading session on March 9, 2021, majority of coverred warrants decreased following underlying securities. Trading value increased strongly.
