## Struggling around the reference

### BSC's Forecast on the stock market

	Negative	Neutral	Positive
Day 28/4/2021		•	
Week 26/4-30/4/2021		•	
Month 04/2021		•	

#### Market outlook

**Stock market:** Although VN-Index had a few minutes of decline at the beginning of the morning session, it recovered and mainly struggled around the reference level. In addition, investment cash flow improved with 10 out of 19 industry groups gaining points while foreign investors were net buyers on both HSX and HNX. Besides, market breadth turned to equilibrium with declining liquidity compared to the previous session. In our opinion, the VNIndex may move in a narrow range next session but the downside risk is still present.

**Future contracts:** All future contracts increase following VN30. Investors might consider buying for long-term contracts.

**Covered warrants:** In the trading session on April 27, 2021, majority of coverred warrants increased following underlying securities. Trading value increased.
