Market outlook

**Stock market:** VNIndex consolidated in the morning but started gaining in the afternoon session. Investment cash flow was the same as the previous session when 12/19 sectors had positive movements. Meanwhile, foreign investors were net buyers again on both HSX and HNX. However, market breadth turned negative with increased liquidity compared to the previous session. According to our assessment, cash flow is clustering in some stocks instead of spreading to the whole market. VN-Index is likely to consolidate the support level of 1,300 points in the next trading sessions.

**Future contracts:** All future contracts increased following VN30. Investors might consider buying for short-term contracts.

**Covered warrants:** In the trading session on May 26, 2021, majority of covered warrants decreased, while majority of underlying securities increased. Trading value decreased strongly.
