Market outlook

Stock market: VNIndex was in red in the whole session and corrected strongly in the afternoon session. However, bottom-fishing cash flow poured into the market significantly when VN-Index fell below 1400 points and thus, helped the market recover to 1411 points at the end of the session. Investment cash flow weakened when only 4/19 industry groups gained. Meanwhile, foreign investors were net sellers on both the HSX and HNX. Besides, market breadth turned negative with a strong increase in liquidity compared to the previous session. With the above cash flow trend, VN-Index may move in the price range of 1400-1450 points this week.

Future contracts: All future contracts increased following VN30. Investors might consider buying for long-term contracts.

Covered warrants: In the trading session on July 5, 2021, majority of coverred warrants decreased following underlying securities. Trading value decreased.
