BSC's Forecast on the stock market			
	Negative	Neutral	Positive
Day 17/9/2021		•	
Week 13/9-17/9/2021		•	
Week 6/9-10/9/2021		•	

Market outlook

Stock market: The market traded sideways in the September futures contract expiration session. Investment cash flow narrowed in some sectors as only 11/19 groups gained with the growth spearheads from Communications, Electricity, Water, and Petroleum and Banking. Market breadth remained positive with liquidity unchanged from the previous session. Meanwhile, foreign investors were net sellers on both HSX and HNX. Low liquidity along with narrow market range shows that investors are trading cautiously. With such a trend, VN-Index may continue to consolidate around 1350 points in the next trading sessions.

Future contracts: Except for VN30F2110, all future contracts increased following VN30. Investors might consider buying for long-term contracts.

Covered warrants: In the trading session on September 16, 2021, majority of covered warrants increased following underlying securities. Trading value increased slightly.

Technical analysis: BMI_ Positive
