Market outlook

Stock market: VN-Index today continued its upward journey to test MA50. Although it was not successful, it was still a positive signal since VN-Index ended the session with an increase of nearly 8 points. Today's session continued to be the golden age of Real estate stocks as many stocks continued to reach the ceiling, saving many investors from being stuck with the stocks which had been unsellable. Market breadth was quite balanced with 10/19 industries gaining. Regarding the transactions of foreign investors, today they were a net seller of more than 1,000 billion on the HSX and a net buyer on the HNX. In the last week of the lunar year 2021, VN-Index may have accumulation sessions moving sideways around 1480 area.

Future contracts: The uptrend of VN30 has led to an increase in the score of futures contracts. Investors can look to buy short-term.

Covered warrants: In the trading session on January 21, 2022, most warrants increased slightly following the movement of the underlying stock.
