### Red of Tet

#### BSC's Forecast on the stock market

	Negative	Neutral	Positive
Day 25/1/2022		•	
Week 24/1-28/1/2022		•	
Month 1/2022		•	

#### Market outlook

Stock market: Real estate and Securities sectors were on the floor all day. Other stocks, in general, were also in red. There were 419 stocks falling, but only 66 stocks advancing. There were only 1/19 sectors gaining, which is Banking with an increase of 0.32%. Foreign investors are also a minus point as they continued to net sell VND 225 billion on the HSX. According to technical analysis, VN-Index has approached the MA100 and there is a high possibility that there will be no breakthrough in the last week of this lunar year. However, investors should not be too worried because in January 2021 there was also a similar correction, and VN-Index reversed to increase after successfully testing MA100. The index is likely to gradually stabilize in the coming sessions after successfully testing MA100 level and may reverse to increase after the Lunar New Year holiday ends.

**Future contracts:** The correction of VN30 led to a decrease in the scores of futures contracts. Investors should trade cautiously in the coming sessions.

**Covered warrants:** In the trading session on January 24, 2022, most warrants fell sharply following the movement of the underlying stock.

#### Outlook:

- VN30 dropped 30.85 points to 1471.31 points. Stocks such as HPG, MSN, VHM, VPB, STB, FPT had a negative impact on VN30's movement. VN30 once again returned to the support level of 1470-1480 points. The movement trend is in an unpredictable state after today's strong correction.
- VN30's correction has led to a decrease in the scores of futures contracts. In terms of trading volume, contracts VN30F2206 and VN30F2209 decreased, while the remaining contracts increased. In terms of open positions, all contracts increased. A falling score and an increase in open interest indicate a strong shorting bias. Investors should trade cautiously in the coming sessions.
