### Market outlook

**Stock market:** 1500 is such a struggling threshold for investors to concern about when VN-Index has been hovering in this area forever. After yesterday session lost nearly 9 points by sellers, today buyers regained exactly those 9 points, VN-Index ended the session at 1498.78 with improved liquidity compared to yesterday. Real Estate, Construction stocks had a prosperous session with many strong gainers, while the divergence occurred in Steel, Oil & Gas and Banking sectors. Market breadth tilted to the positive side with 16 out of 19 sectors gaining. Regarding the transactions of foreign investors, today they were a net buyer on the HSX and a slight net seller on the HNX. In the coming sessions, VN-Index is likely to continue to accumulate around 1500 points before it can bounce up and break the next resistance levels.

**Future contracts:** Futures contracts all increased according to the movement of the VN30 index. Investors can buy futures contracts.

**Covered warrants:** In the trading session on March 1, 2022, most warrants moved in the opposite direction with the movement of the underlying stock.

**Outlook:**

- VN30 increased 2.94 points to 1520.12 points. Stocks like VIC, VNM, TPB, VHM, KDH had a positive impact on VN30's movement. The sideways trend of VN30 is still showing quite weak gaining momentum and may continue to correct to the threshold of 1500 points in the next trading sessions.

- Futures contracts all increased according to the movement of the VN30 index. In terms of trading volume, futures contracts all decreased. In terms of open positions, all contracts increased, except VN30F2206. An increase in the score and an increase in open interest indicates a long accumulation trend. Investors can buy futures contracts.
