Market outlook

Stock market: After yesterday's correction, the market struggled throughout today's session but recovered slightly at the end of the session. Market breadth tilted to the positive side with 15 out of 19 sectors gaining. Although the market recovered slightly, the weak liquidity and the signal of the Fed raising interest rates on Thursday still created a cautious sentiment in the market. Regarding foreign trade, this block was a net seller on the HSX and HNX.

Future contracts: Futures contracts moved in opposite directions as the VN30 index increased slightly. Investors can consider buying short-term contracts.

Covered warrants: In the trading session on March 15, 2022, most warrants differentiated according to the movement trend of the underlying stock.
