Market outlook

Stock market: Surging up at the beginning of the session, VN-Index continuously fluctuated around the threshold of 1454 - 1460 points. Most sectors experienced divergence, so they could not create motivation for VN-Index to rise. Market breadth tilted to the positive side with 15 out of 19 sectors gaining slightly. Regarding the transactions of foreign investors, today they were net sellers on both HSX and HNX. In the next few sessions, if strong bottom-fishing force appears, the index will return to test 1466; otherwise VN-Index will drop to the next support level at 1432.

Future contracts: Futures contracts all increased according to the movement of the VN30 index. Investors may consider selling short-term futures contracts.

Covered warrants: In the trading session on March 16, 2022, most of the warrants increased according to the movement of the underlying stock.
