Market outlook

Stock market: The market struggled in a range of 6 points throughout the day with modest liquidity, showing that investors are still quite hesitant about bottom-catching. At the end of the session, VN-Index only increased by 2 points, almost unchanged compared to yesterday. Cash flow seems to continue to leave stocks related to commodity prices such as Oil & Gas, Steel, Fertilizer, Coal, etc. and tends to prefer Banks and Real Estate. Market breadth tilted to the positive side with 9 out of 19 sectors gaining. Regarding the transactions of foreign investors, today they were net buyers on the HSX and net sold on the HNX. In the coming sessions, VN-Index may return to 1470-1475.

Future contracts: Futures contracts all gained slightly when the VN30 index corrected. Investors should trade cautiously in the coming sessions.

Covered warrants: In the trading session on March 17, 2022, most warrants differentiated according to the movement trend of the underlying stock.
