Market outlook

Stock market: VN-Index went down at the opening session, leveled off at the end of the morning session and continued its decline in the afternoon session. The index even broke through 1200, but then the cash flow appeared and helped the index narrow its drop. At the end of the session, Vn-Index closed at the support level of 1210, down more than 16 points compared to yesterday. Market breadth tilted to the negative side with 14 out of 19 sectors dropping. Investors need to keep an eye on the Fed's decision to raise interest rates announced tonight. The rate of interest rate increase than previously expected at 0.5% is considered a negative signal for the market.

Future contracts: The futures contracts mostly rallied according to the movement of the VN30 index. It is recommended that investors consider Long futures contracts in the next trading sessions.

Covered warrants: In the trading session on June 16, 2022, warrants increased according to the movement of the underlying stock.
